<b>SECTION 3 - LDF PERFORMANCE .....</b>	<b>7</b>
PERFORMANCE INDICATORS.....	7
HOUSING.....	7
Percentage of new and converted dwellings on previously developed land .....	9
Housing Densities .....	9
Affordable housing completions .....	9
Percentage of new dwellings of 3 or more bedrooms (in Tonbridge Town Centre) .....	9
Percentage of new build homes meeting Code Level 3 in the Code for Sustainable Homes.....	10
Percentage Improved energy efficiency of homes within the borough .....	10
Amount of derelict land and buildings .....	10
Number of homeless households (statutory homeless households) .....	10
Average house prices .....	10
Number of vulnerable households living in a decent home .....	11
Housing Benefit and Council Tax claimants.....	11
Percentage of households in fuel poverty .....	11
Number of households with no central heating .....	11
COMMERCIAL & ECONOMIC DEVELOPMENT.....	11
Amount of land developed for employment by type .....	12
Percentage of floorspace by employment type, which is on previously developed land .....	13
Employment land supply by type .....	13
Amount of employment land lost to other uses .....	13
Amount of completed retail, office and leisure development (with the percentage for Tonbridge Town Centre) .....	13
Tonbridge Town Centre - Pedestrian Flows.....	14
Tonbridge Town Centre - Vacancy Rates .....	14
Percentage of retail frontages in central Tonbridge .....	15
Amount of inappropriate ground-floor uses in District and Local Retail Centres (as defined in Policy R1 of the DLA DPD) .....	16
Amount of residential and/or business use of upper floors within District and Local Centres (as defined in Policy R1 of the DPD) .....	17
TRANSPORT .....	18
Percentage of development in urban areas within 400 metres of half hourly bus service, Percentage of development in rural areas within 800 metres of an hourly bus service and number of planning applications with approved Travel Plans.....	18
Number of cycling routes and Length of cycling routes in Tonbridge completed .....	18
Percentage of planning permissions exceeding parking standards .....	18
RECREATION & COMMUNITY FACILITIES.....	18

Number of principal public open spaces that have a management plan in accordance with the Green Flag Award .....	18
Percentage of users who are satisfied with the Council's principal public open spaces.....	19
Percentage of residents who visit one or more public open spaces during the last 12 months.....	19
Number of tickets sold for the Tonbridge Castle Festival of Music and Fireworks .....	19
Number of visitors to key tourist attractions in the Borough .....	19
Expenditure per visitor .....	19
<b>ENVIRONMENT .....</b>	<b>19</b>
Number of planning permissions granted contrary to the advice of the Environment Agency on either flood defence grounds or water quality .....	19
Number of properties at risk from flooding .....	20
Change in priority BAP habitats.....	20
Change in extent of areas designated for their intrinsic environmental value .....	20
Level of population of wild birds .....	20
Percentage of SSSI's in favourable condition .....	20
Extent of Ancient Woodland .....	20
Installed capacity for energy production from renewable sources.....	21
Area under Countryside Stewardship schemes .....	21
Net percentage of land in Green Belt that has been developed .....	21
Percentage of developments incorporating use of SUDS .....	21
Preserving the special character of Conservation Areas - total number of Conservation Areas .....	21
Preserving the special character of Conservation Areas - Percentage of Conservation Areas with an up-to-date Character Appraisal.....	22
Grade I and II* listed buildings at risk of decay .....	22
Extent to which the council keeps on schedule in measuring and reporting on levels of air, land and water pollution.....	22
Number of Air Quality Management Areas (AQMAs) .....	22
CO <sup>2</sup> Emissions .....	23
Days when air pollution is moderate or high.....	23
Rivers of Good or Fair chemical and biological water quality.....	23
Percentage of household waste arisings which have been sent by the authority for recycling and for composting (excludes home composting) or treatment by anaerobic digestion .....	23
Percentage change from the previous financial year in the number of kilograms of household waste collected per head of population.....	23
<b>SECTION 4 LDF IMPLEMENTATION AND DELIVERY .....</b>	<b>25</b>
CORE STRATEGY .....	25
DEVELOPMENT LAND ALLOCATIONS DPD .....	26
TONBRIDGE CENTRAL AREA ACTION PLAN.....	27

<b>ANNEX C SITE-SPECIFIC PROPOSALS IMPLEMENTATION PROGRESS .....</b>	<b>65</b>

## SECTION 1 - INTRODUCTION

### Purpose and content of the Annual Monitoring Report (AMR)

- 1.1 This Annual Monitoring Report (AMR) has been prepared in accordance with the requirements of Section 35 of the Planning and Compulsory Purchase Act 2004 and with the detailed requirements of Regulation 48 of the Town and Country Planning (Local Development) (England) Regulations 2004. The 2010 AMR is the second to monitor the Local Development Framework (LDF). It has been prepared in accordance with the advice in "Local Development Framework Monitoring: A good Practice Guide" (October 2004) and pays regard to the "Regional Spatial Strategy and Local Development Framework Core Output Indicators Update 2/2008".
- 1.2 The AMR starts by providing some contextual information. It then provides an update on progress with the preparation of the LDF in relation to the approved Local Development Scheme. It then goes on to monitor performance against the various Performance Indicators set out in the Development Plan Documents (DPDs). The details of these are set out in Annex B. It also provides an update on progress with the implementation of all site-specific proposals in the LDF and those in the Local Plan which have been saved and not so far superseded. Details of Implementation are set out in Annex C.
- 1.3 It should be noted that the AMR covers the twelve-month period from 1st April 2009 to 31st March 2010. Anything that has happened subsequent to 31st March 2010, apart from progress with the LDF, is not specifically covered in this report. The 2010 AMR is published at a stage where all four of the DPDs, which together comprise the LDF, have been adopted. However, the Managing Developing and Environment DPD (MDE DPD) was not adopted until April 2010 which means that the results of monitoring will not be reported until the 2011 AMR.

### Geography

- 1.4 Tonbridge and Malling Borough covers 24,013ha and stretches north, beyond the M2 motorway, encompassing Blue Bell Hill Village and parts of Walderslade. To the South of the M2 is an area of the Borough known locally as the 'Medway Gap'. This comprises a number of former industrial villages on the east and west banks of the River Medway which is an area based on a history of cement and papermaking. The urban area immediately to the south, comprising the parishes of Leybourne, East Malling & Larkfield, Ditton and Aylesford lie on and between the M20 and A20, and has good links to both London and Dover. The market town of Tonbridge, with a population of approximately 35,000 people, is located in the south of the Borough. The remainder of the Borough is predominantly rural in character, with villages and small towns of varying size and character. The main rural settlements are West Malling, Borough Green, Hadlow, Hildenborough and East Peckham as well as the still developing new mixed-use community at Kings Hill on the former West Malling Airfield.

### Employment and the Economy

- 1.5 Tonbridge and Malling Borough has the third lowest unemployment rate in the County as at August 2010 (2.3%). The Barclays Bank survey (2007) showed that Tonbridge & Malling Borough was the top in Kent with regards to average household annual income (£63,550) and sixth in the South East. The majority of the residents travel to London to work, many by train, particularly from Tonbridge. (source KCC)

- 1.6 The 'Rural Areas Quality of Life' Survey index 2009 examines data at local authority (LA) level of 114 rural local authorities. Tonbridge & Malling sits at number 28 of the group as having the Best Quality of Life.
- 1.7 On the Index of Deprivation 2007, the Borough ranks as the least deprived overall in Kent and ranks 300th out of 354 districts nationally. However, there is considerable variation within the Borough. Two of the wards, East Malling and Snodland East, stand out as particular areas of disadvantage. East Malling statistically ranks as the third most deprived ward in West Kent and Snodland East, the fourth.

### Indicator Values for Tonbridge & Malling taken from KCC Economic Profile of T&M 2010.

"Scores" for the selected area - based on Ranked Index within all UA/Countries in England  
Tonbridge and Malling, Kent

	2003	2004	2005	2006	2007	2008	2009	2010
Unemployment Rate	84	81	73	72	76	80	79	79
Median Full-time Earnings (Workplace)	73	80	76	59	69	65	76	76
Median Full-time Earnings (Residence)	68	73	74	80	83	81	73	86
Employment Rate	87	58	60	58	87	73	33	41
Total Employees	55	57	54	57	60	57	59	59
Stock of Businesses	54	54	55	56	56	57	56	58
3 Year Business Survival Rates	89	65	63	46	75	89	80	62
GVA per head	73	68	70	65	71	71	69	68
% Employees in the Knowledge Economy	62	72	71	81	78	67	63	67
% Working Age Population with NVQ4+	32	64	54	32	64	84	55	42

It is important to remember that these scores are based on the ranking position of the selected area relative to all other Districts/Unitary Authorities in England.

Data Values - Actual Indicator values  
Tonbridge and Malling, Kent

	2003	2004	2005	2006	2007	2008	2009	2010

(KCC Analysis and Information Systems)

### Population and Households

- 1.8 The 2001 Census recorded the Borough's population as 107,561 the seventh highest in Kent at the time of which 52,642 were male and 54,919 were female. In mid 2009 the population of the Borough was estimated to be 117,400 of which 57,400 were male and 59,900 were female. The population density as at 2009 was 4.89 people/ha,
- 1.9 In 2001 the census showed that 21.5% of the Borough's population was aged 15 or under and 63% of the borough's population was aged between 16-64, In 2001 those aged over 65 represented 15% of the Borough's population. By 2008 this had risen to 16.5% and the working age population (16-64) had fallen to 62.8%.
- 1.10 Of the total population of the Borough, 24.4% were one-person households. In 2006 there were an estimated 46,100 households in the borough. If past trends continue there would be 129,600 residents and 55,000 households by 2029, but this would assume no change in planning policy and sufficient sites available to accommodate this level of growth.

	2001 Census	%	Mid-2009	%
Aged up to 15	23165	21.5	24,300	20.7
Aged 16-24	9635	9.0	11,600	9.9
Aged 25-34	14004	13.0	11,900	10.1
Aged 35-44	17255	16.0	18,700	15.9
Aged 45-59	21803	20.3	23,900	20.4
Aged 60-64	5490	5.1	7,600	6.5
Aged 65-84	14426	13.4	17,000	14.5
Aged 85+	1783	1.7	2,300	2.0
All ages	107,561		117,400	

## Ethnicity

- 1.11 At the time of the 2001 Census 105,714 (98.3%) of the population classed themselves as white British, the highest proportion in Kent. The single largest Black or Minority Ethnic (BME) group in the Borough was Asian or Asian British but these represented only 0.5% of the population. By Mid 2007 (Experimental Updated) Ethnic Population Statistics indicate that 110,200 (95.3%) people said they were white and 5,500 were non-white (4.7%).

## Environmental Protection

- 1.12 Nearly three quarters of the Borough is covered by the Metropolitan Green Belt - approximately 17060ha. The part of the Borough outside the Green Belt includes the important Strategic Gap separating the Medway Gap from Maidstone and the Medway Towns, extensive parts of the Kent Downs Area of Outstanding Natural Beauty, areas of the “best and most versatile” agricultural land and areas of national and local nature conservation interest. Furthermore, much of the lower lying land in the Medway Valley lies within the floodplain of the River Medway and is subject to varying degrees of flooding constraint.
- 1.13 Sites of Special Scientific Interest within the Borough are:
- Bourne Alder Carr
  - Houlder to Monarch Hill Pits Upper Halling
  - Halling to Trottiscliffe Escarpment
  - Holborough to Burham Marshes
  - One Tree Hill & Bitchet Common
  - Oldbury and Seal Chart
  - Peters Pit, Wouldham
  - Trottiscliffe Meadows
  - Ayelsford Pit
  - Wateringbury
  - Wouldham to Detling Escarpment
- 1.14 Local Wildlife Sites (formerly Sites of Nature Conservation Interest) are sites that have been identified as being regionally important for Kent as a whole. At present, the Borough of Tonbridge and Malling contains a total of 46 Local Wildlife Sites, the majority of which were during the monitoring period protected by policies in the Tonbridge and Malling Borough Local Plan and are now protected by policies in the Managing Development and the Environment DPD (MDE DPD).
- 1.15 There are 59 Conservation Areas in the Borough and 1318 Listed Building records. Historic Parks and Gardens are records of traditional landscape designs that form part of our cultural heritage. There are 23 Historic Parks and Gardens in the Borough.

## SECTION 2 - LDF PROGRESS

### Local Development Scheme

- 2.1. The current Local Development Scheme (LDS) was approved in June 2009. The LDS sets out the Local Development Documents that together comprise the Local Development Framework. Figure 1 shows the Local Development Framework structure and content.

### The First Tranche

- 2.2. The three First Tranche DPDs were submitted to the Secretary of State on 1 September 2006. The Core Strategy was adopted by the Council, incorporating the changes proposed by the Inspector, on 25 September 2007. The Tonbridge Central Area Action Plan and the Development Land Allocations DPD were both adopted by Council on 22 April 2009 in line with the approved LDS of the time. The initial Saved Policies Compendium was also published in April 2008.

### The Second Tranche

- 2.3. Public consultation on the Issues and Options for the Managing Development and the Environment DPD took place between 14 March and 2 May 2008. Pre-submission publication took place between 14th March and 1st May 2009. A further 6 weeks consultation took place between 29th May and 10th July 2009 on an addendum which dealt with a number of minor technical errors in the published plan. Submission to the Secretary of State took place on 31st July 2009 which was in line with the approved LDS. The Public Hearing took place between 25th November and 2 December 2009. The Inspector's Report was received in February 2010. The DPD was adopted on 20 April 2010 in line with the approved LDS. The Saved Policies Compendium was updated accordingly.

### Supplementary Planning Documents

- 2.4. Now that the Government has confirmed that the Community Infrastructure Levy will be retained the preparation of the Tonbridge Central Area Regeneration Fund SPD, which is still referred to in the approved LDS, will not now be progressed.
- 2.5. The Following Supplementary Planning Guidance (SPG) prepared under previous legislation will remain a material consideration until such time as the particular development is fully implemented.
- Cattle Market, Tonbridge: Planning Brief, September 1997
  - Town Lock Enhancement Brief, April 2004
  - West Malling Station Planning Brief, April 2005
- 2.6. The following Village Design Statements and other documents have been adopted as a material consideration for development control:
- Shipbourne Village Design Statement (part adopted as SPG), February 2002
  - East Malling Village Design Statement, May 2004
  - Kent Downs AONB Landscape Design Handbook, January 2005
  - Plaxtol Village Design Statement, April 2005
  - AONB Management Plans for the Kent Downs and the High Weald (April 2009)

2.7. The following Supplementary Planning Documents have been formally adopted:

- Kent Design, July 2006 (supplementary to Core Policy CP24)
- Affordable Housing SPD, July 2008 (supplementary to Core Policies CP17 and CP19)

Kent Design was originally adopted pursuant to Saved Local Plan Policy P4/11 which has now been superseded by Core Policy CP24 which has the same effect. It is therefore now regarded as being supplementary to the new policy.

2.8. In 2009/10 the Council started work on preparing the Character Area Appraisals SPD pursuant to Policy SQ1 in the MDE DPD. This is being prepared as a series of separate volumes dealing with all of the main built-up areas in the Borough. It is being prepared in three main tranches:

**First Tranche**

Tonbridge, Hildenborough and Hadlow	Public Consultation - 13 September to 22 October 2010	Adoption 17 February 2011
-------------------------------------	-------------------------------------------------------	---------------------------

**Second Tranche**

Borough Green, East Peckham, Snodland and Walderslade	Public Consultation – March/April 2011	Adoption programmed for 12 July 2011
-------------------------------------------------------	----------------------------------------	--------------------------------------

**Third Tranche**

Medway Gap and West Malling	Public Consultation – June/July 2011	Adoption programmed for February 2012
-----------------------------	--------------------------------------	---------------------------------------

2.9. Following the preparation of the MDE DPD the Council may also prepare SPDs relating to the following subjects, but work on these is not yet programmed:

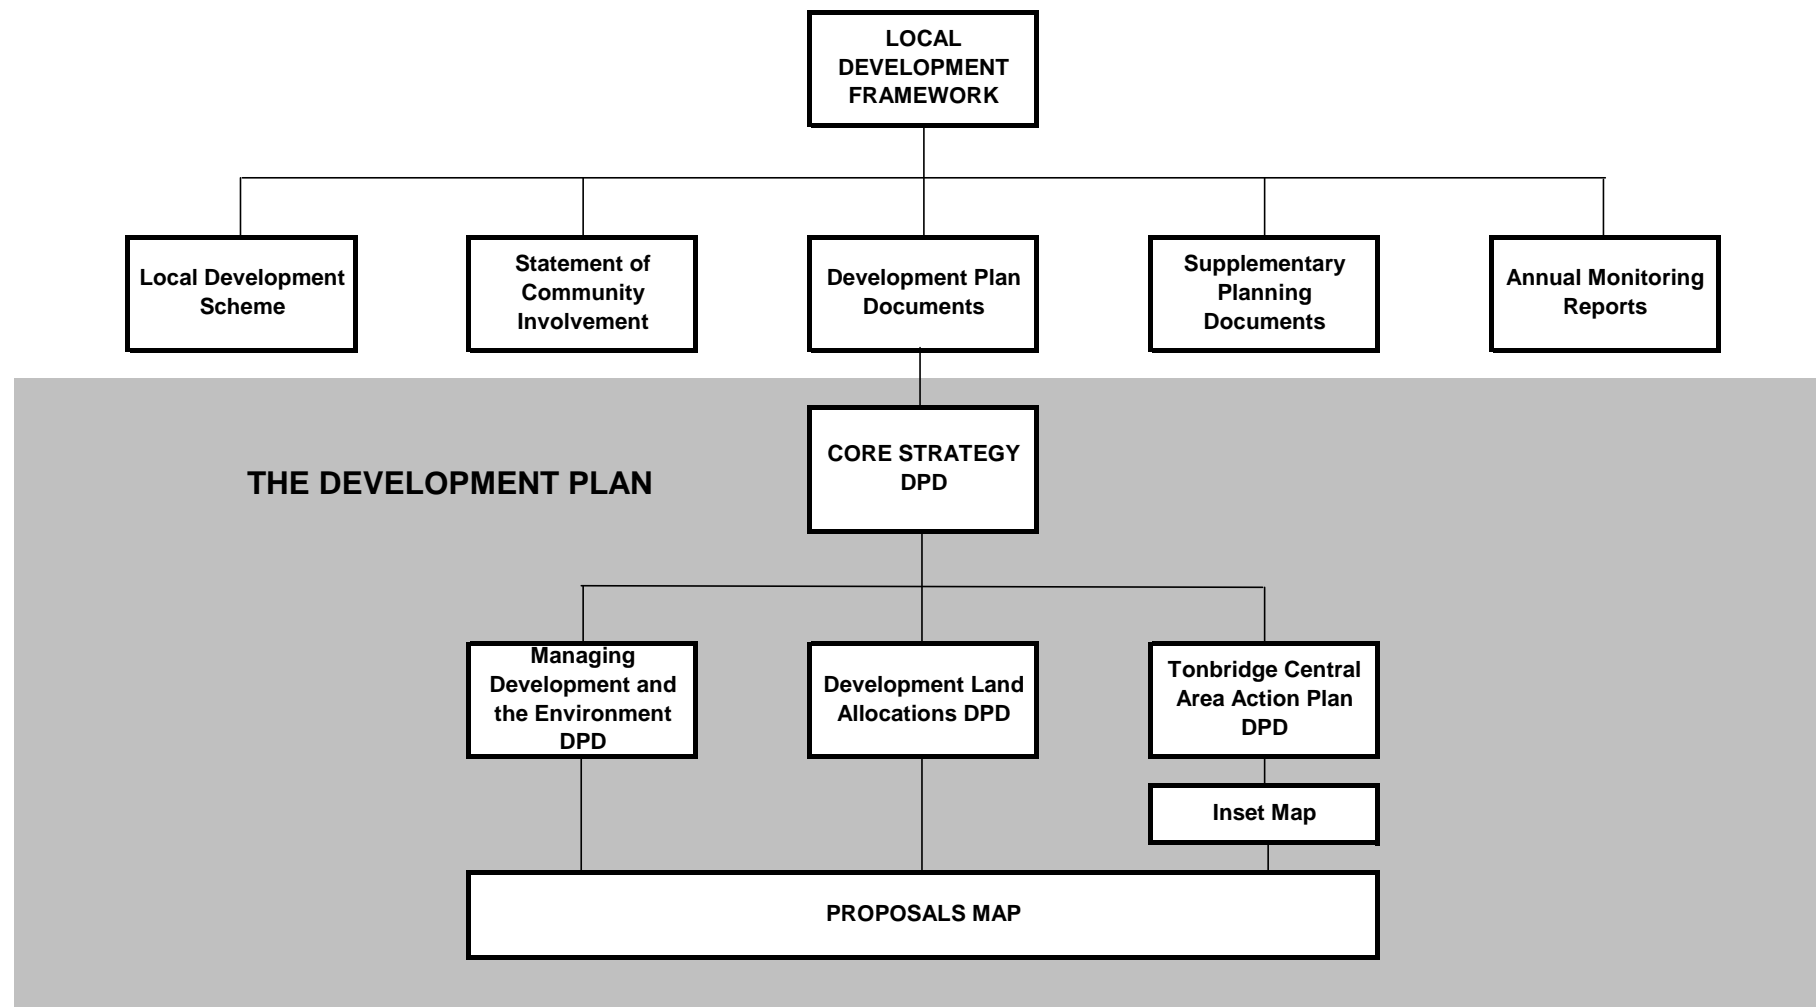

- Residential Extensions/Annexes
- Shopfront Design
- Advertisements
- Vehicle Parking Standards

**Gypsy and Traveller Accommodation Assessment**

2.10. A joint Gypsy and Traveller Accommodation Assessment prepared in conjunction with Maidstone, Tunbridge Wells and Ashford Boroughs and in line with the advice in Circular 01/2006 (Planning for Gypsy and Traveller Sites) was published in June 2007. The results do not indicate that the needs are so pressing in Tonbridge and Malling that a dedicated Gypsy and Travellers' Accommodation DPD needs to be produced at an earlier stage. Other solutions are being explored.

Figure 1 Local Development Framework Structure and Content

**LOCAL DEVELOPMENT FRAMEWORK STRUCTURE AND CONTENT**

## SECTION 3 - LDF PERFORMANCE

### PERFORMANCE INDICATORS

- 3.1. A set of 198 national Core Output Indicators was announced as part of the Comprehensive Spending Review 2007. These have since been reduced in 2009/10 by 18 indicators, and post 2010 a further 16 will be dropped. After 2012 it is expected that the central requirement to monitor all remaining indicators will be removed. At present, Local Authorities are also recommended to identify and monitor Local Output Indicators. These should address the outputs of LDF policies and should focus in particular on those aspects of the policies not covered by the DCLG Core Output Indicators. The set of Local Output Indicators has changed over time as the LDF has been prepared and as policies begin to be implemented.
- 3.2. Significant Effects Indicators are similar to Local Output Indicators in that they are identified by local authorities through the LDF. However, they are specifically linked to the Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) objectives and are intended to enable a comparison to be made between the predicted and actual effects of the implementation of LDF policies on the sustainability of the area. Notwithstanding the different purposes of the Local Output and Significant Effects Indicators, there is in practice, a good deal of overlap in the framing of the indicators. This reflects the way in which the Council has integrated the objectives established in the SA/SEA into the LDF documents. Taken together with the Core Output Indicators and Local Output Indicators, the Significant Effects Indicators should allow a robust assessment of policy implementation over the life of the LDF.
- 3.3. The full details of the framework including the index numbered indicators, targets and data for the 2009/10 period can be found in Annex B. Where a time series already exists for an indicator this also included. Otherwise, 2008/09 is normally the base-year where data exists. What is set out below is a selection of indicators which require a greater degree of analysis, commentary or explanation.

### HOUSING

- 3.4. The South East Plan (May 2009) covers the period from 2006 to 2026, although the new coalition Government proposes to abolish the SEP, this AMR deals with the 2009/10 period during which time the SEP still formed part of the development plan. The South East Plan (SEP) requires the provision of 450 units per year on average, which is a total of 6750 units between 2006 and 2021.
- 3.5. Annex A sets out the housing trajectory for the Borough. The trajectory tracks the provision of housing supply over the lifespan of the adopted LDF (2006-2021). The purpose of the trajectory is to highlight the robustness and soundness of the overall housing strategy in the adopted DPD's and how it is performing in relation to the annualised housing requirements identified in the Local Development Framework. The trajectory highlights the following information:
  - Past dwelling completion rates
  - Projected future dwelling completion rates (excluding windfalls for the first 10 years)
  - Dwelling requirement – annual net additional dwelling requirement from the South East Plan from 2006 to 2021
- 3.6. The housing trajectory in Figure A2 is based upon the projected phasing of housing development as set out in Figure A1. This includes an assumption about the yield

from windfall development but, in accordance with PPS3, only after 2020. Details of the phasing of all housing commitments are set out at the end of Annex A under Figure A5. The trajectory also includes data on **managing** housing delivery in Figure A3 and on **monitoring** housing delivery in Figure A4. The manage line indicates the under or oversupply of dwellings at any one point. This is calculated by subtracting the completions to date from the total allocation and then dividing the answer by the number of years remaining in the LDF period. The monitor line demonstrates how many dwellings above or below the planned rate the Local Development Framework strategy is at any point in time. This is calculated by subtracting the completions from the annualised allocation from the South East Plan.

- 3.7. The trajectory highlights that at 31 March 2010 Tonbridge and Malling Borough had achieved 134% of the SEP requirement for the period to 2021; an excess of 1,525 dwellings above the overall requirement. Since the Plan began a total of 2,859 units have so far been completed. This level of supply is partly as a result of the Secretary of State's decision in November 2004 to support the Borough Council in granting planning permission for the development of three major sites at Kings Hill (750 units), Holborough Quarry (1,000 units with an additional 250 units permitted within the AMR period) and Leybourne Grange (723 units, including the conversion of a Listed Building and associated development). In May 2006 the Borough Council added to this by approving an outline application at Peters Pit for 1,000 dwellings.
- 3.8. The trajectory clearly illustrates the healthy land supply position for residential development in the Borough during the lifetime of the adopted LDF. However, it is recognised that recent economic circumstances have affected delivery and this is reflected in the significant down turn in completions in 2009/10. In the light of this, a relatively conservative estimate of projected completions has been assumed over the next few years, but only monitoring will confirm whether this in fact occurs.
- 3.9. Locationally, there had been a marked increase in recent years in the number of residential schemes within Tonbridge town centre, with a significant number of dwellings completed in 2008/09 compared to previous years. However, due to the economic downturn, only 7 out of the estimated 107 units for the 2009/10 period were in fact completed.
- 3.10. As at the 31 March 2006 base-date of the Plan, Annex A in the Development Land Allocations DPD showed that planning permission already existed for some 4,606 dwellings which were due to be implemented during the Plan period. It was recognised that the yield on these sites could vary if revised planning permissions were granted. A number of significant planning permissions have been granted since 31 March 2006. As at 31 March 2010 there were 4,318 units still to be implemented. Until this AMR period, when house building rate slowed, the outstanding commitment at the end of each year had been decreasing, which is to be expected as the plan is implemented.

Year	2006	2007	2008	2009	2010
Number of outstanding units with planning permission	4,606	5,265	5,015	4,261	4,318

- 3.11. Over the last 4 years these unimplemented planning permissions were mainly windfall permissions and the reserved details for Kings Hill, Leybourne Grange and Holborough, as well as the 1,000 dwelling outline permission at Peters Pit. In addition

to these sites with permission there are also the unimplemented housing allocations in the Development Land Allocations DPD.

- 3.12. Land at Bushey Wood was identified in the Tonbridge and Malling Borough Local Plan as a broad Area of Opportunity for future development. This proposal has been carried forward into the LDF (Core Strategy Policy CP16). Since there is unlikely to be a need for further housing land to meet strategic requirements up to 2021, there is no need to firmly allocate any land for this purpose

### **Percentage of new and converted dwellings on previously developed land**

- 3.13. Government policy requires new development (including conversions and change of use) to be focused on previously-developed land ('brownfield' sites), rather than undeveloped 'greenfield' land. The government has set an explicit target in PPS3 (Housing) that 60% of all new housing development should take place on previously developed land by 2008.
- 3.14. Annex B shows that the government target of 60% has been significantly exceeded since monitoring of the LDF started. 'Local Performance Indicator' LPI 601 - '% New Homes Built on Previously Developed Land' – includes a target of 99% for the year 2009/10 for Tonbridge and Malling Borough. As illustrated in Annex B, this target was met in 2009/10 with 99% of all housing development taking place in that year on previously developed land. In future this is likely to be a lower figure due to the change in national policy with regards to garden development, now categorising it as Greenfield rather than Brownfield land.

### **Housing Densities**

- 3.15. 27.4% of the 372 dwellings completed in 2009/10 were built at a density of above 30 dwellings per hectare. 72.6% were built below this density. This is largely due to the number of smaller-scale developments on large sites in rural areas and the continued implementation of some pre-PPS3 planning permissions. Of the 372 dwellings completed in 2009/10, only 7 were completed in the Tonbridge Central Area. 5 of these were built at a density of above 30 dwellings per hectare.

### **Affordable housing completions**

- 3.16. Many households are unable to secure an affordable home, either to rent or buy. Consequently the number of households seeking assistance through the Council's Housing Register remains high at around 1,400. During 2009/10 260 affordable homes were provided through the planning system and by direct provision by the Council's housing association partners. For the second year running the Council's target was exceeded. Housebuilders have been hit hard by the recession and most have had problems in selling new homes. Places such as the Frantchach Site, Ditton and Holborough Park at Snodland have, as a result, resorted to selling off some houses for affordable housing. This partly explains the large gains in affordable housing completions during 2008/09 and 2009/10.

### **Percentage of new dwellings of 3 or more bedrooms (in Tonbridge Town Centre)**

- 3.17. None of the seven units completed were 3 bedrooms or more in the Town Centre during this AMR period. There were 4 x 1 bed and 3 x 2 bed. However, it must be noted that this indicator (TCAAP 2.2) is low due to inconsistency with data collection in previous years and may have affected previous baseline data. This has now been rectified which will result in greater accuracy in this and future AMRs.

### **Percentage of new build homes meeting Code Level 3 in the Code for Sustainable Homes**

- 3.18. The Code for Sustainable Homes measures the sustainability of a new home against categories of sustainable design, rating the 'whole home' as a complete package. The Code uses a 1 to 6 star rating system to communicate the overall sustainability performance of a new home. The Code sets minimum standards for energy and water use at each level and, within England, replaces the EcoHomes scheme, developed by the Building Research Establishment (BRE). On the 27 February 2008 the Government confirmed a mandatory rating against the Code for Sustainable Homes will be implemented for new homes from 1 May 2008. Since April 2007 the developer of any new home in England can choose to be assessed against the Code. At present there are no systems in place to monitor this Indicator.

### **Percentage Improved energy efficiency of homes within the borough**

- 3.19. Local Performance Indicator 404 (previously LPI 50) relates to renewable energy capacity installed by type. The Borough Council has records of informal inquiries and planning applications made for renewable energy installations going back to 2000. It should be noted that certain proposals for renewable energy installations do not require planning permission and installations will have been made without the Council's knowledge. The increased public awareness of environmental and climate change issues means that the number of renewable energy related inquiries is increasing. . LP404 is derived from a random survey undertaken each year, and shows that around 3% of homes within the Borough have improved energy efficiency. This seems low, but the monitoring of this indicator is difficult at this time, as there is no comprehensive record system of works done to individual properties.

### **Amount of derelict land and buildings**

- 3.20. These Statistics are based on the 'Urban Settlements Boundaries' (England and Wales, 2001) data are from the CLG. The statistics provide the total area of Developed Land and Urban Area (developed land with a population of more than 10,000) for each local authority in England. Also included are areas and population for each individual settlement in England and Wales. The 28 parishes that make up the Borough equal approximately 24,013 ha of land, of which 2863.39ha is classed as developed land and urban area (CLG). This equates to 11.9% of the Borough. According to the 2001 Census the Borough has 110ha of derelict land and buildings, which is less than 1% of the Borough.

### **Number of homeless households (statutory homeless households)**

- 3.21. There is a large drop for 2009/10 which is due to homelessness and housing options services returning in-house which has enabled the Council to take a more proactive approach to homeless prevention.

### **Average house prices**

- 3.22. This data is taken from the Kent County Council's 'House Prices and Transactions' 2009 Annual Document. Overall, house prices dropped significantly in 2009:

	Tonbridge & Malling									
	Detached		Semi detached		Terraced		Flat/Maisonette		All dwellings	
	£	No	£	No	£	No	£	No	£	No
2000	265,377	448	127,156	528	102,665	516	86,485	142	153,784	1,634
2001	275,229	704	143,053	890	112,662	661	116,303	199	170,616	2,454
2002	307,049	728	173,489	824	130,345	707	136,918	266	196,064	2,525
2003	356,836	481	193,585	690	156,061	634	137,827	221	214,518	2,026
2004	382,681	647	211,932	883	174,994	643	168,036	267	242,670	2,440
2005	373,769	510	219,566	714	180,027	650	180,076	224	240,584	2,098
2006	428,260	678	239,311	908	191,577	791	184,762	342	265,679	2,719
2007	440,471	729	259,610	880	214,236	859	178,426	387	281,135	2,855
2008	442,890	298	249,916	370	203,923	398	192,735	241	269,366	1,307
2009	411,893	352	227,373	458	181,180	398	173,280	167	254,670	1,375

### Number of vulnerable households living in a decent home

- 3.23. The Council is under a duty to assess the housing conditions in the borough. Guidance advises that this is best done by carrying out regular house condition surveys, usually once in every five years. The findings from the survey are essential to inform and support the Council's housing strategy, to provide information to complete the Housing Investment Programme submission to the DCLG and to meet the requirements of the Home Energy Conservation Act 1985 as well as inform this indicator. The Council's latest House Condition Survey was published in October 2006.
- 3.24. The 2006 House Condition Survey demonstrates that excellent progress has been made within the borough in improving the housing stock. The survey findings indicate that the 2021 Decent Homes Target has already been achieved and exceeded and that the rate of unfitness in the borough has been halved.

### Housing Benefit and Council Tax claimants

- 3.25. If someone has claimed both Housing Benefit and Council Tax Benefit then it is only counted once. This is classed as a case. The figures show that in 2007/08 the number of cases dropped compared to the previous financial year, however, due to the economic downturn during the 2008/09 the claimants and caseloads increased considerably making it the highest results since monitoring began. In 2009/10, the IS/JSA increased from last year and the Standard decreased slightly in both the caseloads and claims

### Percentage of households in fuel poverty

- 3.26. This Indicator is not monitored annually. The figures are taken from the Stock Condition Survey 2006.

### Number of households with no central heating

- 3.27. This Indicator is not monitored annually. The figures are taken from the Stock Condition Survey 2006.

### COMMERCIAL & ECONOMIC DEVELOPMENT

- 3.28. Audits of commercial land are produced for each local authority in Kent, on a yearly basis by Kent Country Council in conjunction with the districts. They provide information on the number of completions by use class, rates of development set out in Development Plan Document and planning permissions on a site-by-site basis including those developments completed, not started or under construction.

**Amount of land developed for employment by type**

3.29. During 2009/10 38,228m<sup>2</sup> of gross floorspace was developed for employment within the Borough. Of this, 57% was developed for B1a (office) uses. 2006/07 saw a huge floorspace gain of over 40,000 sqm. This was mainly the result of the major developments at Land at Dean & Dyball, Endeavor House, Forstal Road and Site 2 & former Ditton PC, Allotments, Bellingham Way, which resulted in a gain of 20,083 sqm for these two applications alone. 2007/08 and 2008/09 saw just 20,766m<sup>2</sup> and 20,716m<sup>2</sup> completed in each of the respective monitoring periods, a significant drop from the 2006/07 period. In 2009/10, there was an increase of 82% from 2008/09 in completions, which includes development at River Lawn in Tonbridge and Oakhill House in Hildenborough for but the overall total was still lower than 2006/07. This presumably reflects the economic down-turn, which is further illustrated by a general slowdown in the receipt of planning applications. Importantly, in terms of the target there has overall been no net loss of employment land since the base date of the plan.

**Percentage of floorspace by employment type, which is on previously developed land**

3.30. 100% of completions were on previously developed land.

**Employment land supply by type**

3.31. No data available during the monitoring period.

**Amount of employment land lost to other uses**

3.32. No data available during the monitoring period.

**Amount of completed retail, office and leisure development (with the percentage for Tonbridge Town Centre)**

3.33. These indicators have only been monitored for one previous monitoring period, so trends cannot yet be established but there was a lot more development borough-wide in 2008/09 than in the previous year. For this monitoring period, out of the completions shown below 110m<sup>2</sup> (0.01%) of A1-A5 uses (retail/restaurant) and 1,245m<sup>2</sup> (0.06%) of B1 (office) uses took place in the Tonbridge Town Centre.

3.34.

### Tonbridge Town Centre - Pedestrian Flows

3.35. Pedestrian counts have been undertaken in Tonbridge town centre on roughly the same dates and in the same locations over the past 9 years. Pedestrian counts help to give a general indication of the amount of activity in the High Street and of the relative concentrations of shopping activity. The table and diagram below illustrate pedestrian movements numbers recorded for Tonbridge for the years 2000 to 2009.

**Pedestrian Movements 2000 - 2009**

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
Botany	1508	1055	1061	1228	967	1321	1273	1318	1034	968
Pavilion	1992	1909	2016	1917	1826	1807	1878	1724	1693	1685
High Street East	2173	2229	2274	2021	2031	1823	1967	2018	1545	1623
High Street West	1891	1767	1883	1587	1643	1705	1832	1723	2084	1549
<b>Total</b>	<b>7564</b>	<b>6960</b>	<b>7234</b>	<b>6753</b>	<b>6467</b>	<b>6656</b>	<b>6950</b>	<b>6783</b>	<b>6356</b>	<b>5825</b>

3.36. The results for 2009 show that total pedestrian activity in the town centre has decreased quite significantly since 2006 and has decreased by 9% from 2008. It is, in fact, at its lowest since surveying began in 2000. In terms of locations, there was a slight decrease at the Pavilion compared with the previous year, and more significant decreases at the Botany and High Street West from the level recorded in 2008. However, High Street East showed a slight increase in activity.

### Tonbridge Town Centre - Vacancy Rates

3.37. The number of vacant properties in a town is one of a number of indicators of how vibrant the centre is. The diagram below illustrates vacancy rates for both the upper and lower parts of the High Street. Overall, the rate is the highest it has been since records began in 1997.

3.38. The lower part of the High Street has historically experienced significantly lower vacancy rates than the Upper High Street. For 2009 the vacancy rates of 4.11% for the Lower High Street, which has dropped slightly from last year, but at 21.43% the vacancy rates in the Upper High Street are the highest since monitoring began. This is likely to be due to the impact of the recession on local businesses in this more marginal retail area.

**Percentage of retail frontages in central Tonbridge**

3.39. Performance Indicator 1.5 aims to monitor the primary retail function of the town centre shopping areas. For 2009, 67.25% of the frontages in the Lower High Street area were in retail (A1) use. This is the lowest figure since monitoring began in 1997.

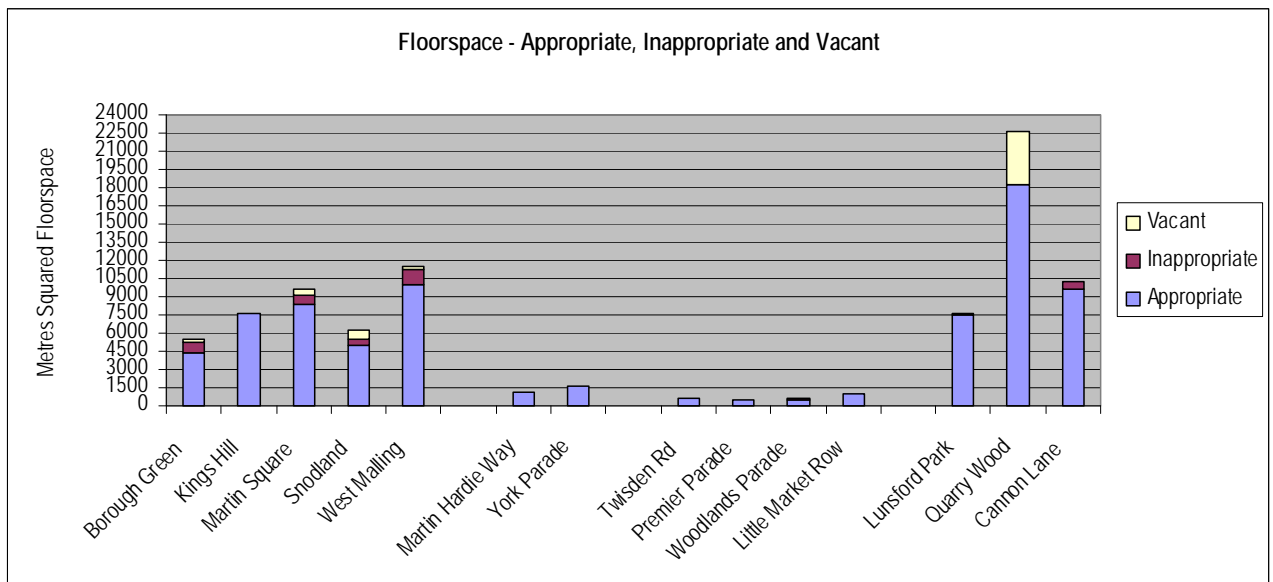

3.40. The chart below shows the use class split in the Upper High Street area. Whilst vacancy rates are at 21%, the highest since monitoring began, the relative proportions of occupied uses are fairly constant, with little change year on year, with the exception of the 'Other' use classes falling from 12% to 6% since 2008. The main change is therefore due to the increase in vacant properties, mainly in the Upper High Street.

**Amount of inappropriate ground-floor uses in District and Local Retail Centres (as defined in Policy R1 of the DLA DPD)**

3.41. Appropriate uses within District and Local Centres are set out in Annex A of PPS 6 – Planning for Town Centres (21<sup>st</sup> March 2005). This includes the range of shops and services to meet the day to day needs of a community such as banks, shops, post offices, libraries and community centres. The aim of the indicator is to identify the amount of inappropriate uses in terms of the number of units and amount of overall floorspace in each of the centres identified in Policy R1. For the purposes of monitoring, inappropriate uses are defined as B2 (industrial), B8 (warehousing) and C3 (ground floor) residential uses. The following charts also identify the number of units and amount of floorspace which is vacant, since this is also a good indicator of the health of a centre.

3.42. From the above graphs, and the detailed tables in Annex B, it can be seen that of the 86,535m<sup>2</sup> of floorspace in the retail centres combined, 76,010m<sup>2</sup> is in appropriate uses, 4,081m<sup>2</sup> is inappropriate uses and 6,444m<sup>2</sup> is vacant. This shows that 88% of the total district supply is appropriate use, leaving only 4.6% in inappropriate use and 7.4% vacant. This compared with the previous year of 2008/09 shows that there was a decrease of appropriate use from 94% and rise from 3.5% inappropriate and 2.5% Vacant uses.

3.43. When looking at the centres individually, it can be seen that it is the District Centres where most of the inappropriate units are sited. An increase in vacant units are sited Quarry Wood due to the fire at the Homebase store. Vacancy rates have been increasing and will probably increase further if the economic situation does not improve. Ground floor residential units are the main type of “inappropriate uses” in the District Centres, but these may not always be an unacceptable use.

3.44. The District Centres show a good mix of retail and office uses, whilst the Tonbridge Urban Local Centres, Medway Gap Local Centres and Out of Centre Retail Areas show a predominance of retail uses (Classes A1-A5). Even though the economic downturn has hit many businesses over the last year, the vitality and viability of the retail areas monitored under Policy R1, seem to be as healthy as can be expected in such circumstances.

**Amount of residential and/or business use of upper floors within District and Local Centres (as defined in Policy R1 of the DPD)**

3.45. The tables in Annex B for use classes on the first and second floors show the number of units and approximate floorspace for each retail policy area. The graph below shows that places such as West Malling, Martin Square and Kings Hill have a higher floorspace of ‘other uses’ above ground floor including retail. A Higher rate of vacant floorspace seems to be in West Malling and Snodland and a higher proportion of residential and business uses are now in Borough Green and West Malling. Both centres are larger centres and this reflects in the higher amount of vacancy/other uses on first and second floors. In the case of the Local Centres residential is the predominant use of upper floors.

## TRANSPORT

### Percentage of development in urban areas within 400 metres of half hourly bus service, Percentage of development in rural areas within 800 metres of an hourly bus service and number of planning applications with approved Travel Plans

3.46. At present there are no systems in place to monitor these Indicators.

### Number of cycling routes and Length of cycling routes in Tonbridge completed

3.47. These Indicators are not yet monitored. A draft Cycling Strategy for the Borough has been produced by Kent County Council with support from the Borough Council which is currently being updated. Once it is finally adopted, the proposals it contains will be monitored. The draft Strategy proposes two 2 regional routes and has 46 recommendations for the provision of links, paths and other cycling facilities within the Borough.

### Percentage of planning permissions exceeding parking standards

3.48. At present there are no systems in place to monitor this Indicator..

## RECREATION & COMMUNITY FACILITIES

3.49. Leisure and Arts is largely a non-statutory service but it plays an essential role in assisting the Council to meet some of its key corporate priorities.

### Number of principal public open spaces that have a management plan in accordance with the Green Flag Award

3.50. In this monitoring period three out of the target of four public open spaces have a management plan. These were at Leybourne Lakes Country Park, Haysden Country Park and Tonbridge Racecourse Sportsground. At present two of the parks have the Green Flag Award, which are Leybourne Lakes and Haysden.

### **Percentage of users who are satisfied with the Council's principal public open spaces**

- 3.51. Over the last two monitoring periods, the target rate of 85% has been met, showing that users are satisfied with the Open Spaces provided, however, this monitoring period showed that only 72% were satisfied, which meant that the target was not met. However, it must be noted that this indicator is measured at different sites each year. This monitoring period was measured at Tonbridge Racecourse.

### **Percentage of residents who visit one or more public open spaces during the last 12 months**

- 3.52. LP814, (formerly LP81) was deleted from 1 April 2009 .

### **Number of tickets sold for the Tonbridge Castle Festival of Music and Fireworks**

- 3.53. This Indicator is a local Significant Effect Indicator from the SA/SEA. Although the target was not met in 2006/07, the steady increase in ticket sales shows that this event is becoming ever more popular, falling just short of this years target of 5,000 sales.

### **Number of visitors to key tourist attractions in the Borough**

- 3.54. There are eight key tourist attractions in the Borough. The key tourist attractions are:

- Tonbridge Castle
- Ightham Mote
- The Hop Farm
- Aylesford Priory
- Broadview Gardens
- Great Comp Gardens
- Donderry Nursery
- Nepicar Farm

- 3.55. Visit Kent produce 'The Business Barometer' which is a monthly snapshot of tourism business performance in Kent. The Borough only has three of the attractions contributing to the Barometer; Donderry Nursery, Ightham Mote and The Hop Farm.

### **Expenditure per visitor**

- 3.56. This Indicator is not yet monitored

## **ENVIRONMENT**

- 3.57. Tonbridge & Malling has a high quality environment with some of the most beautiful landscapes in the county. It is not surprising therefore that, residents, landowners, statutory and other bodies place a high value on the local environment, and wish to see it protected and well managed. For the purposes of this section, 'environment' encompasses both the countryside and the built environment of towns and villages as well as air and water quality, flooding and waste management.

### **Number of planning permissions granted contrary to the advice of the Environment Agency on either flood defence grounds or water quality**

- 3.58. During the AMR period the Environment Agency reported that it had objected to eleven planning applications on flood risk grounds, although one was shown to be

reported in error, so only there were only ten objections during 2009/10.. Two applications were refused, two were withdrawn, one was pending consideration as at 31st March 2010 and five were approved. The EA eventually withdrew their objections in respect of the five approved applications. There were no applications objected to by the Environment Agency on water quality grounds during the AMR period.

### **Number of properties at risk from flooding**

3.59. The Environment Agency figures show a year on year increase from 2006. This is partly due to changes in the extent of areas liable to flood and partly due to permissions being granted in the light of other overriding material considerations. Several locations are in flood risk areas, for example Tonbridge Town Centre and parts of Hildenborough, East Peckham, Aylesford, Snodland and Wouldham.

### **Change in priority BAP habitats**

3.60. This Indicator is not monitored annually. Survey work was being undertaken in the 2009/10 monitoring period which will be reported in the 2011 AMR.

### **Change in extent of areas designated for their intrinsic environmental value**

3.61. This indicator is not monitored on an annual basis

### **Level of population of wild birds**

3.62. The RSPB webpage has a series of reports with information on the population of birds. Many sources of information are used to produce an up-to-date overview of the health of bird populations in the UK and its Overseas Territories. The state of the UK's birds report 2008, was published in 2009 and contains results from annual, periodic and one-off surveys and studies from as recently as 2008.

<http://www.rspb.org.uk/ourwork/science/sotukb/index.asp>

### **Percentage of SSSI's in favourable condition**

3.63. This is the second year of monitoring the SSSI's in favourable condition and shows that from the baseline data of 65%, in 2009/10 this rose to 75% for those in favourable condition.

### **Extent of Ancient Woodland**

3.64. This is the second year of monitoring the Extent of Ancient Woodland. However, the Council had commissioned a comprehensive study of Ancient Woodland in the Borough which was published in the spring of 2010. The results of this study will set a new benchmark for monitoring. The aim is for there to be no loss of Ancient Woodland.

3.65. The area of ancient woodland in the borough since the original inventory was produced has risen from 2,560 ha to 2,621 ha, a gain of roughly 60 ha as a result of the latest survey. This is a net gain, representing 400 ha of newly identified areas and roughly 340 ha of loss of previously designated land. This brings the portion of the borough's area identified as ancient woodland to slightly below 11%.

### **Installed capacity for energy production from renewable sources**

- 3.66. Policy CP1 in the Council's adopted Core Strategy seeks to achieve high quality sustainable development in the borough. In support of achieving this policy, the Council has produced several technical guides on renewable energy technologies that potentially can be incorporated into developments. These guides outline how the technology works, what the benefits are and when and where it is suitable. The guides also provide sign posts to organizations who can offer expertise and detailed practical advice, including information on available grants. The guides cover Photovoltaics, Solar Water Heating, Wind Power, Biomass and Ground Source Heat Pumps. So far in this monitoring period there has been one recorded completion of a grant-supported scheme for a Solar Hot Water Scheme. This is a difficult Indicator to monitor because not all installations require any form of permission and therefore no contact with the Council. Take-up of grant-assisted schemes has so far been slow. For details of the Guides go to:

<http://www.tmbc.gov.uk/cgi-bin/buildpage.pl?mysql=3172>

### **Area under Countryside Stewardship schemes**

- 3.67. This monitoring year saw the deletion of the indicator for 'Area under Countryside Stewardship Schemes' and the introduction of the Environmental Stewardship Programme:

<http://www.naturalengland.org.uk/ourwork/farming/funding/es/default.aspx>

### **Net percentage of land in Green Belt that has been developed**

- 3.68. Nearly three-quarters of the Borough lies within the Green Belt. The boundaries of the Green Belt were set in previous local plans and were carried forward with mainly minor changes into the LDF. The only significant change was the release of Isles Quarry West at Borough Green from the Green Belt. The LDF also identifies existing major developed sites within the Green Belt where infilling or redevelopment may be permitted. Those which were not already implemented were carried forward from the adopted Local Plan and are identified in the Development Land Allocations DPD under Policy M1. No new housing or commercial development was completed in the Green Belt during 2009/10.

### **Percentage of developments incorporating use of SUDS**

- 3.69. In support of Core Policy CP1 the Council has produced two guides, one on '**Saving Water at Home**' and one on '**Sustainable Drainage Systems**' (SUDS) that identify measures that can be adopted by householders and businesses alike and integrated into the design of new developments. Each guide identifies why there is a need to address the issue of water efficiency, conservation and management locally, what the benefits are of integrating and adopting certain measures, and also when and where they are suitable. The guides also provide sign posts to Organizations who can offer expertise and detailed practical advice. The Indicator is not currently monitored.

### **Preserving the special character of Conservation Areas - total number of Conservation Areas**

- 3.70. A Conservation Area is an area of special architectural or historic interest the character of which it is desirable to preserve or enhance. There are 59 Conservation Areas in the Borough.

### **Preserving the special character of Conservation Areas - Percentage of Conservation Areas with an up-to-date Character Appraisal**

3.71. During the previous monitoring period the Council undertook a review of the Conservation Area Appraisal for Tonbridge which included boundary changes. These boundary changes were finally approved on 14 July 2009. During 2009/10 a Conservation Area Appraisal of the Quarry Hill, Tonbridge Conservation Area was completed which included boundary changes which were adopted by Council on 19 November 2009.

### **Grade I and II\* listed buildings at risk of decay**

3.72. English Heritage holds a register of those buildings at risk. There is only one listed building at risk in the Borough which is Hadlow Tower. There is a confirmed Compulsory Purchase Order for the Tower. The Council intends to compulsorily acquire the Tower and transfer it to the Vivat Trust in January 2011. It is anticipated that work on the full restoration of the building will start soon after.

3.73. Of the 30 ancient monuments at risk in Kent, three are in the Borough – a Romano-British Villa, Anglo Saxon Cemetery & Associated remains at Eccles, the Chapel of St Blaise, Offham and the Town Banks, Tonbridge. The first two are threatened by agricultural practices beyond the Council's control. The Borough Council does not consider the Town Banks to be under threat. They will be protected and enhanced in association with proposed development on adjacent land.

### **Extent to which the council keeps on schedule in measuring and reporting on levels of air, land and water pollution**

3.74. The monitoring period of 2009/10 showed 82% of the Indicators were kept on schedule and monitored. All essential sampling has been carried out, including air quality and private waters.

### **Number of Air Quality Management Areas (AQMAs)**

3.75. Where a local authority considers that one or more of the air quality objectives is unlikely to be met it must declare an Air Quality Management Area covering the part of the area where the problem lies. Having declared an Air Quality Management Area the local authority must draw up an action plan setting out what it will do to meet the objectives within the area. Six Air Quality Management Area's have been identified in the Borough:

- M20 between New Hythe Lane, Larkfield, and Hall Road at Aylesford,
- Tonbridge High Street (southern end),
- A26 Tonbridge Road/Red Hill junction in Wateringbury,
- London Road/Station Road junction at Ditton,
- London Road in Aylesford and
- London Road, Larkfield/Ditton.

3.76. The Council continues to monitor air quality through an ongoing process of Updating and Screening Assessments and, where warranted, Detailed Assessments, and works with the Kent & Medway Air Quality Partnership to secure a coordinated approach to the monitoring and improvement of air quality in Kent.

## **CO<sup>2</sup> Emissions**

- 3.77. There is no result for NI195 for 2009/10 as this is the base year on which to calculate a percentage reduction. The Council's Climate Change Strategy includes a 10% target for reducing CO<sup>2</sup>, NO<sub>x</sub> and PM<sub>10</sub> emissions over three years, including 2009/10.
- 3.78. The result for the new Indicator NP186 is provided by the Department for Environment, Food and Rural Affairs (Defra). The Council's target is to reduce CO<sup>2</sup> emissions by 11.2%, or 0.87 tonnes, over the period 2008/11. The base figure of 7.8 tonnes in 2007/08 is the only available statistics at present. The Council's targets for NP186 have been set in line with Kent Agreement 2.

## **Days when air pollution is moderate or high**

- 3.79. The main source of air pollution in the borough is road traffic emissions from major roads, notably the M20, M26, M2, A20, A21, A25, A26, A227, A228 and A229. The six Air Quality Management Areas relate to road traffic emissions of nitrogen oxides and, in one area (M20 corridor), additionally particulates (PM<sub>10</sub>). Other pollution sources, including commercial, industrial and domestic sources, also make a contribution to background pollution concentrations. However, there were no days in the monitoring period where the air pollution was moderate or high.

## **Rivers of Good or Fair chemical and biological water quality**

- 3.80. This indicator has not been monitored in previous years. The rivers that are of good or fair chemical and biological water quality in Tonbridge and Malling can be viewed on the Environment Agency's website at:

<http://maps.environment-agency.gov.uk/wiyby/wiybyController?x=357683.0&y=355134.0&scale=1&layerGroups=default&ep=map&textonly=off&lang=e&topic=riverquality#x=562867&y=145187&lq=2,7,&scale=4>

## **Percentage of household waste arisings which have been sent by the authority for recycling and for composting (excludes home composting) or treatment by anaerobic digestion**

- 3.81. During the monitoring period the original two Indicators have been replaced by indicator NP192 - percentage of household waste sent for reuse, recycling and composting. In 2009/10 the figure was 44.20%. This figure has doubled since 2007/08 partly due to the indicator itself now incorporating other factors. However, it 2% lower than 2008/09 which was 46.23%.

## **Percentage change from the previous financial year in the number of kilograms of household waste collected per head of population**

- 3.82. During the monitoring period this Indicator was replaced by indicator NP191 'Kilograms of residual household waste per household'. For 2009/10 the figure was 537kg. This is 26kg per head lower than the figure for the previous year which was 563kg.

## SECTION 4 LDF IMPLEMENTATION AND DELIVERY

- 4.1 Annex C shows progress with the implementation and delivery of all site-specific proposals in the Core Strategy, the Development Land Allocations DPD and Tonbridge Central Area Action Plan. It also monitors the implementation of any site-specific Saved Policies not covered elsewhere in the AMR.

### CORE STRATEGY

- 4.2 The Core Strategy section of Annex C monitors policies CP4, CP15, CP16 and CP18.
- 4.3 In accordance with the advice contained in Annex B of PPG2 (Green Belts), and to ensure that the boundaries of the Green Belt will endure, the Council specifically excluded certain sites from the Green Belt around Tonbridge and at Hadlow, and Wrotham so that they could remain available to meet the long-term development needs. The following areas are defined as Safeguarded Land under Policy CP4 and are reserved for future development.
- North of Lower Haysden Lane, Tonbridge;
  - North of Dry Hill Park Road, Tonbridge;
  - Carpenters lane, Hadlow;
  - Land at Howlands Allotments, Wrotham.

They will not be released for development before 2021 other than through a review of the Local Development Framework and only then if there is a demonstrable shortfall of housing land relative to the prevailing requirements of the Core Strategy. These sites remain safeguarded.

- 4.4 CP15 shows that all four major sites at Kings Hill (estimate of 1,456 units), Leybourne Grange (723 units), Peters Pit (1,000 units) and Holborough (938 outstanding units and a further 62 units completed prior to the monitoring of the plan period), have planning permissions, and are at various stages of development. A total of 2,887 units are complete out of the total of 4,117 units (plus 62 units prior to plan period), the majority of those being at Kings Hill. During the monitoring period housing development has commenced at Leybourne Grange and at Peters Pit some advanced ground works had been undertaken.
- 4.5 Land at Bushey Wood was identified in the Tonbridge and Malling Borough Local Plan as a broad Area of Opportunity for future development. Since there is unlikely to be a need for further housing land to meet strategic requirements up to 2021, there is no need to firmly allocate any land at Bushey Wood during the plan period. It is therefore carried forward as new policy, CP16, and remains safeguarded for long-term development beyond the time horizon of the LDF.
- 4.6 CP18 Isles Quarry West, please see policy H2 of DLA DPD

## DEVELOPMENT LAND ALLOCATIONS DPD

- 4.7 The DLA DPD section of Annex C monitors Policies H1, H2, H3, H4, E3, M1, S1, S2 and S3.
- 4.8 Policy H1 will yield a total of 191 units, none of which were completed during this AMR period. Policy H2 (Isles Quarry West) will yield 200 units. There were no completions on this site during 2009/10. The site has been marketed and pre-submission discussions and public consultation on a draft scheme has taken place. A planning application is expected during 2011. Policy H3 has a 180 unit planned capacity. There has been no progress in this AMR period, though it is understood that the Health Authority is undertaking some preliminary master planning work in conjunction with Royal British Legion Industries who jointly own the site. Policy H4 includes a number of sites which may or may not come forward during the plan period. They are all suitable for housing and in total will yield some 328 units. None were completed during this AMR period and no permissions on these sites were granted.
- 4.9 The Employment Land Review (July 2005) sets out a baseline for employment land provision in the Borough. The aim is to retain the level of provision existing at the base date of the plan. Policy E3 identifies large vacant sites (in excess of 0.5 ha) potentially available for employment development within the areas identified for employment use under Policies E1 and E2. Some of these already had planning permission at the time of adoption of the plan. Other opportunities will arise from the redevelopment or intensification of use on existing employment sites. One permission was granted on a Policy E3 site during this monitoring period: a gain of 6,906m<sup>2</sup> B1a which has not started
- 4.10 With regards to Major Developed Sites in the Greenbelt, PPG2 advises that where major development exists within the Green Belt, the Local Plan may identify such sites and apply appropriate policies to them. There are a number of major developed sites within the Green Belt in the Borough that it is appropriate to treat in this way. These are listed in Policy M1. No permissions were granted nor development completed on any of these sites during 2009/10.
- 4.11 Policy S2 safeguards land for parking at West Malling Station. Planning permission was granted on 7 September 2005 for a change of use of land to a car park which was under construction during the monitoring period and is now complete and operational.

## **TONBRIDGE CENTRAL AREA ACTION PLAN**

- 4.12 The TCAAP section of Annex C monitors Policies TCA10, TCA11, TCA12, TCA13, TCA14 and TCA16.
- 4.13 Policy TCA10 has seen a scheme designed and approved for the Town Lock area of Tonbridge. This has now been designed to conceptual level. No progress has been made on the other Public Realm Priorities.
- 4.14 There are eight outstanding planning permissions under policy TCA11, of which 1 was completed in this AMR period. This resulted in a gain of 439m<sup>2</sup> of B1a use.
- 4.15 Policy TCA12.3 saw the first phase of the Lansdowne Road Link completed during the previous monitoring period as part of the development of the Cattle Market site. No other progress has been made on any other transportation measures including pedestrian priority measures under Policy TCA13.
- 4.16 Policy TCA14 'Tonbridge Station Interchange Enhancement'. A proposal by Network Rail is now included in the DfT funded National Station Improvement Programme. Design work is underway by Network Rail. Further work will ultimately be carried out by Kent County Council as Highway Authority but this is not yet programmed.
- 4.17 Policy TCA16 saw no progress during the monitoring period for new parking provision.
- 4.18 The 'Outstanding Planning Permission' section of Annex C monitors the progress of a total 564 housing units under 12 separate planning applications in the Tonbridge Central Area. Of the 564 units, 2 units were completed during the AMR period. As at 31<sup>st</sup> March 2010 a total of 315 units had been completed, 93 had not started and 156 were under construction.

## **SITE-SPECIFIC SAVED LOCAL PLAN POLICIES (NOT COVERED ELSEWHERE)**

- 4.19 The Saved Local Plan Policies section of Annex C monitors Policies P8/3 and P8/6. Policy P8/3 identifies 'sites suitable for Open Playing Space'. These sites represent opportunities to enhance existing provision and in some cases they are the only practical opportunities promoted by Parish Councils to address locational deficiencies. Policy P8/6 identifies 'sites suitable for Informal Open Space'. Informal recreation involves use of open areas for relaxation and general enjoyment of the countryside. These policies are now superseded by policies in the Adopted MDE DPD which is to be monitored from 1 April 2010. During the monitoring period, both policies saw some progress. But most of the sites were completed prior to the monitoring period.

## **SECTION 5 - CONCLUSIONS**

### **HOUSING**

- 5.1 For the first time, housing completions fell short of the annual South East Plan (SEP) requirement. The total number of dwellings completed in the Borough on all sites in the year ending 31st March 2010 was 372 units, bringing the total number of dwelling completions since the beginning of the LDF period to 2,859. The SEP requirement up to 2021 is 6,750 dwellings. The residual requirement is therefore 3,891; an annual requirement of 354 units a year which is much lower than the average rate of construction over the past few years which means that the overall requirement should easily be met, particularly when the economy recovers. Furthermore, the housing trajectory demonstrates that by the end of the LDF period (2021) the amount of housing completions will have exceeded the SEP requirement by some 22.5%. Clearly, the housing land supply position in the Borough is very healthy and will be ready to respond to the market upturn when it occurs.
- 5.2 The Government's target that 60% of all new housing development should take place on previously developed land is comfortably being met with the figure for 2009/10 being 99%.
- 5.3 The overall amount of affordable housing completions for 2009/10 is approximately 18% above the Local Performance Indicator target. Despite the current economic downturn, average property prices within the Borough remain high compared with the South-East region overall.

### **EMPLOYMENT**

- 5.4 There is still a healthy employment land supply position with the largest concentration of available land being at Kings Hill. In terms of meeting the target there has been no net loss of employment land since the base date of the plan. The main category of employment development that has been implemented in the monitoring period is B1a Business Offices.

### **TONBRIDGE TOWN CENTRE**

- 5.5 There is some concern over the health of Tonbridge town centre with vacancy rates in the Upper High Street Area rising to 21.43%. Furthermore, the level of pedestrian activity in the High Street is at its lowest level overall since monitoring began in 2000. The percentage of frontages in the lower High Street area that were in retail use in 2009 decreased to 67.25%, which is also the lowest recorded figure since monitoring began. Despite the high vacancy rate in the Upper High Street the percentage of retail uses is slightly up on last year with little or no change to A2 (office) and A3-A5 (food/restaurant) uses which continue to support the vitality of the area in the evenings.

### **COMMUNICATIONS INFRASTRUCTURE**

- 5.6 Progress on the implementation of transport schemes within the Borough is slow. A number of the schemes identified in the Plan are development-related which means that their implementation is tied to the investment decisions of developers and landowners.

### **COMMUNITY INFRASTRUCTURE**

- 5.7 The vast majority of the recreation proposals identified in the Saved Policies of the Local Plan have already been completed or are in the process of being implemented.

In accordance with PPG17, an Open Space Strategy was prepared and finalised in January 2009, the findings of which have been taken into account in preparing the Open Space section of the MDE DPD which will be monitored during 2010/11.

#### **OTHER AREAS TO MONITOR**

- 5.8 Methods are in place to measure as many of the Core Output Indicators as feasibly possible. Some of these were monitored pre-Local Development Framework and others are being monitored, or systems put in place during 2010/11, so that they and the MDE DPD Policies can be reported in the 2011 AMR.

#### **LOCAL DEVELOPMENT FRAMEWORK**

- 5.9 With the adoption of the MDE DPD in April 2010 the Development Plan Documents which together comprise the LDF are complete. Their review will depend on the results of monitoring and will need to await the evolution of a new development plan system under the new administration following the coming into force of the Localism Bill which is expected. In the meantime, work is progressing well of the preparation of the Character Area Appraisals SPD
