SECTION 3 - LDF PERFORMANCE.....	11
PERFORMANCE INDICATORS	11
HOUSING.....	12
Percentage of new and converted dwellings on Previously Developed Land	13
Housing Densities.....	14
Affordable Housing Completions	14
Percentage of new dwellings of 3 or more bedrooms (in Tonbridge Town Centre)	14
Number of Homeless Households (Statutory Homeless Households)	14
Average House Prices.....	14
Number of Vulnerable Households living in a Decent Home.....	15
Housing Benefit and Council Tax Claimants	15
COMMERCIAL & ECONOMIC DEVELOPMENT	16
Amount of Land Developed for Employment by Type	16
Percentage of floorspace by employment type, which is on Previously Developed Land.....	18
Amount of completed Retail, Office and Leisure development (with the percentage for Tonbridge Town Centre).....	18
Tonbridge Town Centre - Pedestrian Flows	18
Tonbridge Town Centre - Vacancy Rates	19
Percentage of retail frontages in central Tonbridge.....	20
Amount of inappropriate ground floor uses in District and Local Retail Centres	21
Amount of residential and/or business use of upper floors within District and Local Centres	22
TRANSPORT	23
Number of cycling routes and length of cycling routes in Tonbridge completed	23
RECREATION & COMMUNITY FACILITIES.....	23
Number of principal Public Open Spaces that have a Management Plan in accordance with the Green Flag Award....	23
Percentage of users who are satisfied with the Council's principal Public Open Spaces	23
Number of tickets sold for the Tonbridge Castle Festival of Music and Fireworks	23
Number of visitors to Key Tourist Attractions in the Borough.....	23
ENVIRONMENT	24
Number of planning permissions granted contrary to the advice of the Environment Agency on either flood defence or water quality grounds	24
Number of properties at risk from flooding	24
Change in Priority Biodiversity Action Plan (BAP) Habitats.....	24
Level of population of wild birds	24
Percentage of SSSI's in Favourable Condition	24
Extent of Ancient Woodland	24
Installed capacity for energy production from Renewable Sources.....	25
Area under Countryside Stewardship Schemes.....	25
Net percentage of land in the Green Belt that has been developed.....	25
Preserving the special character of Conservation Areas - Total number of Conservation Areas.....	25
Preserving the special character of Conservation Areas - Percentage of Conservation Areas with an up-to-date Conservation Area Appraisal.....	26
Heritage Assets at Risk	26

Extent to which the Council keeps on schedule in measuring and reporting on levels of air, land and water pollution..	26
Preserving Local Character - Number of Locally Listed Buildings	26
Number of Air Quality Management Areas (AQMAs)	26
CO ² Emissions	27
Days when Air Pollution is Moderate or High.....	27
Rivers of Good or Fair Chemical and Biological Water Quality	27
Percentage of Household Waste Arisings which have been sent by the Authority for Recycling and for Composting (excludes home composting) or treatment by Anaerobic Digestion.....	28
Percentage change from the previous financial year in the number of kilograms of Household Waste collected per head of population	28

IMPLEMENTATION PROGRESS	98

SECTION 1 - INTRODUCTION

Purpose and Content of the Annual Monitoring Report (AMR)

- 1.1 This Annual Monitoring Report (AMR) has been prepared in accordance with the requirements of Section 35 of the Planning and Compulsory Purchase Act 2004 as amended by the Localism Act and with the detailed requirements of the Town and Country Planning (Local Planning)(England) Regulations 2012 – Regulation 34. The 2012 AMR is the fourth to monitor the Local Development Framework (LDF). It has been prepared in accordance with the advice in “Local Development Framework Monitoring: A good Practice Guide” (October 2004) and pays regard to the “Regional Spatial Strategy and Local Development Framework Core Output Indicators Update 2/2008”.
- 1.2 The AMR starts by providing some contextual information. It then provides an update on progress with the preparation of the LDF in relation to the approved Local Development Scheme. It then goes on to monitor performance against the various Performance Indicators set out in the Development Plan Documents (DPDs). The details of these are set out in Annex B. It also provides an update on progress with the implementation of all site-specific proposals in the LDF. Details of Implementation are set out in Annex C.
- 1.3 It should be noted that the AMR covers the twelve-month period from 1st April 2011 to 31st March 2012. Anything that has happened subsequent to 31st March 2012, apart from progress with the LDF, is not specifically covered in this report. The 2012 AMR is published at a stage where all four of the DPDs, which together comprise the LDF, have been adopted.

Geography

- 1.4 Tonbridge and Malling Borough covers 24,013ha and stretches north, beyond the M2 motorway, encompassing Blue Bell Hill Village and parts of Walderslade. To the South of the M2 is an area of the Borough known locally as the 'Medway Gap'. This comprises a number of former industrial villages on the east and west banks of the River Medway which is an area based on a history of cement and papermaking. The urban area immediately to the south, comprising the parishes of Leybourne, East Malling & Larkfield, Ditton and Aylesford lie on and between the M20 and A20, and has good links to both London and Dover. The market town of Tonbridge, with a population of approximately 35,000 people, is located in the south of the Borough. The remainder of the Borough is predominantly rural in character, with villages and small towns of varying size and character. The main rural settlements are West Malling, Borough Green, Hadlow, Hildenborough and East Peckham as well as the still developing new mixed-use community at Kings Hill on the former West Malling Airfield.

Employment and the Economy

- 1.5 As at mid-2011 Tonbridge and Malling Borough had a 2% unemployment rate, compared to the KCC average of 3.1%. The Barclays Bank survey (2007) showed that Tonbridge & Malling Borough was the top in Kent with regards to average household annual income (£63,550) and sixth in the South East. 2010 figures show that Tonbridge and Malling residents earn an average of £552.20 per week. The majority of the economically active residents travel to London to work, many by train, particularly from Tonbridge. (source KCC)

- 1.6 The Halifax 'Rural Areas Quality of Life' Survey index 2010 examines data at local authority level of 140 rural local authorities. Tonbridge & Malling sits at number 10 of the group as having the Best Quality of Life.
- 1.7 On the Index of Deprivation 2010, the Borough ranks as the least deprived overall in Kent and ranks 268th out of 326 districts nationally. However, there is considerable variation within the Borough. Two of the wards, East Malling and Snodland East, stand out as particular areas of disadvantage.

Indicator Values for Tonbridge & Malling taken from KCC Economic Profile of T&M 2012.

Indicator scores for the selected area - based on ranked index within all UAs/Local Authorities in England

Tonbridge and Malling, Kent	2009	2010	2011	2012
% 16-64 claiming out of work benefits	81	80	79	79
Unemployment Rate	79	75	75	74
Median Gross Weekly Workplace Earnings	75	73	80	64
Median Gross Weekly Resident Earnings	72	86	75	86
Employment Rate	40	42	51	47
Total Employees	77	77	77	77
Stock of businesses	51	53	54	54
3-year Business Survival Rate	80	58	79	79
GVA per Head	72	73	72	73
% Employees in the Knowledge Economy	61	65	78	70
% NVQ4+	47	37	58	61

It is important to remember that these scores are based on the ranking position of the selected area relative to all other Unitary Authorities and Local Authority Districts in England.

Data values - actual indicator values for the selected area

Tonbridge and Malling, Kent	2009	2010	2011	2012
% 16-64 claiming out of work benefits	5.9	7.2	7.5	7.1
Unemployment Rate (%)	1.0	2.2	1.9	2.0
Median Gross Weekly Workplace Earnings (£)	500.7	501.8	533.8	493.2
Median Gross Weekly Resident Earnings (£)	518.2	576.6	552.1	600.0
Employment Rate (%)	72.1	72.9	77.8	74.1
Total Employees	55,200	54,800	53,200	53,700
Stock of businesses	5,090	5,280	5,295	5,145
3-year Business Survival Rate (%)	69.5	66.4	70.4	67.4
GVA per Head (£)	19,795	20,809	20,902	20,314
% Employees in the Knowledge Economy	16.8	17.3	20.0	18.2
% NVQ4+	28.0	24.2	35.0	37.9

(KCC Analysis and Information Systems)

Population and Households

- 1.8 The Office for National Statistics released the 2011 Census outputs prospectus on 30 March 2012. The prospectus provides us with a provisional timetable for the release of 2011 Census data which is outlined below. All dates are advisory and may be subject to change:

First release – July 2012

2011 Census population by single year of age and gender at local authority level and higher geographies is now available on the KCC web page.

Please note that data for wards, parishes or smaller geographies will be available in the second release

Second release - November 2012 to February 2013: Single characteristics

This release will give us total counts of population or households by one single characteristic, for example, total number of people by ethnic group or total number of households by tenure.

- Phase 1 - Data for local authority level, Super Output Areas (Middle and Lower level) and Output Areas
- Phase 2 - Data for wards
- Phase 3 - Data for health areas, parishes, postcode sectors and parliamentary constituencies.

Third release - March 2013 to June 2013: Local characteristics

This release will have more detail than the single characteristics, for example the total number of people by ethnic group will be also available by age and sex, and the number of households by tenure will also be available by household size and number of rooms. Local characteristics have been so named because the information will be available down to very small local areas.

- Phase 1 - Data to local authority level, Super Output Areas (Middle and Lower level) and Output Areas
- Phase 2 - Data for wards
- Phase 3 - Data for health areas, parishes and parliamentary constituencies.

Fourth release – July 2013 to October 2013: Detailed characteristics

As the name suggests this release will contain the most detailed information. Total population by ethnic group, age and sex will be also available by health and we can see households by specific age groups of residents, for example people aged 65+. However this information will only be available down to ward level and not for the very small geographies.

- Data to local authority level, Super Output Areas (Middle level), wards and health areas.

Subsequent releases – November 2013 and later:

Data will include origin and destination statistics for travel to work and migration data.

http://www.kent.gov.uk/your_council/kent_facts_and_figures/population_and_census/2011_census/release_timetable.aspx

- 1.9 On Monday 24 September 2012 the Office for National Statistics (ONS) released the unrounded 2011 Census figures for total population by single year of age and gender for local authority areas and higher geographies. This data supplements the initial release of rounded data by 5 year age group and gender released on 16 July 2012.
- 1.10 The 2001 Census recorded the Borough's population as 107,561 the seventh highest in Kent at the time of which 52,642 were male and 54,919 were female. The first results of the 2011 Census shows the population of the Borough was 120,800 of which 59,200 were male and 61,600 were female. The population density is 5.03 people/ha. Therefore the increase from 2001 to 2011 was 12.3% (13,239 people). More comparisons will be shown in the 2013 AMR.
- 1.11 In 2001 the census showed that 21.5% of the Borough's population was aged 15 or under and 63% of the borough's working population was aged between 16-64. In 2001 those aged over 65 represented 15% of the Borough's population. By contrast

the 2011 Census shows us that this had risen to 16.9%, the working age population (15-64 figures used) had risen to 63.7%, and the 0-15 age group has declined by 2%.

- 1.12 Of the total population as at 2001 of the Borough, 24.4% were one-person households. As at 31/3/2012 there were an estimated 50,674 households in the borough. If past trends continue there could be 124,300 residents and 54,700 households by 2026 (taken from 2011 data sources).

	2001 Census	%		2011 Census	%
Aged up to 15	23165	21.5	Aged up to 14	23,400	19.3
Aged 16-24	9635	9	Aged 15-24	13,900	11.5
Aged 25-34	14004	13	Aged 25-34	12,400	10.3
Aged 35-44	17255	16	Aged 35-44	18,200	15
Aged 45-59	21803	20.3	Aged 45-59	24,900	20.6
Aged 60-64	5490	5.1	Aged 60-64	7,600	6.3
Aged 65-84	14426	13.4	Aged 65-84	18,000	14.9
Aged 85+	1783	1.7	Aged 85+	2,500	2.1
All ages	107,561	100	All ages	120,800	100

Ethnicity

- 1.13 At the time of the 2001 Census 105,714 (98.3%) of the population classed themselves as white British, the highest proportion in Kent. The single largest Black or Minority Ethnic (BME) group in the Borough was Asian or Asian British but these represented only 0.5% of the population. By Mid 2009 Ethnic Population Statistics indicate that 110,100 (93.8%) people said they were white and 7,300 were non-white (6.2%).

Environmental Protection

- 1.14 Nearly three quarters of the Borough is covered by the Metropolitan Green Belt - approximately 17,060ha. The part of the Borough outside the Green Belt includes the important Strategic Gap separating the Medway Gap from Maidstone and the Medway Towns, extensive parts of the Kent Downs Area of Outstanding Natural Beauty, areas of the “best and most versatile” agricultural land and areas of national and local nature conservation interest. Furthermore, much of the lower lying land in the Medway Valley lies within the floodplain of the River Medway and is subject to varying degrees of flooding constraint.

- 1.15 There are 11 Sites of Special Scientific Interest within the Borough:

- Bourne Alder Carr
- Houlder to Monarch Hill Pits Upper Halling
- Halling to Trottiscliffe Escarpment
- Holborough to Burham Marshes
- One Tree Hill & Bitchet Common
- Oldbury and Seal Chart
- Peters Pit, Woudham
- Trottiscliffe Meadows
- Ayelsford Pit
- Wateringbury
- Woudham to Detling Escarpment

- 1.16 Local Wildlife Sites (formerly Sites of Nature Conservation Interest) are sites that have been identified as being regionally important for Kent as a whole. At present, the Borough of Tonbridge and Malling contains a total of 46 Local Wildlife Sites, which are now protected by policies in the Managing Development and the Environment DPD (MDE DPD).
- 1.17 There are 60 Conservation Areas in the Borough and 1346 Listed Building records. Historic Parks and Gardens are records of traditional landscape designs that form part of our cultural heritage. There are 23 Historic Parks and Gardens in the Borough.

SECTION 2 - LDF PROGRESS

Local Development Scheme

2.1. The current Local Development Scheme (LDS) was approved in June 2009. The LDS sets out the Local Development Documents that together comprise the Local Development Framework. Figure 1 shows the Local Development Framework structure and content.

The Development Plan Documents

- 2.2. The three First Tranche DPDs were submitted to the Secretary of State on 1 September 2006. The Core Strategy was adopted by the Council on 25 September 2007. The Tonbridge Central Area Action Plan and the Development Land Allocations DPD were both adopted by Council on 22 April 2008 in line with the approved LDS of the time.
- 2.3. The Managing Development and the Environment DPD was submitted to the Secretary of State on 31st July 2009 and was adopted on 20 April 2010 in line with the approved LDS. The Saved Policies Compendium was updated accordingly. The MDE DPD has been monitored since the 2010/11 period.

Supplementary Planning Documents

- 2.4. Now that the Government has confirmed that the Community Infrastructure Levy will be retained the preparation of the Tonbridge Central Area Regeneration Fund SPD, which is still referred to in the approved LDS, will not now be progressed.
- 2.5. The Following Supplementary Planning Guidance (SPG) prepared under previous legislation will remain a material consideration until such time as the particular development is fully implemented.
- Cattle Market, Tonbridge: Planning Brief, September 1997
 - Town Lock Enhancement Brief, April 2004
 - West Malling Station Planning Brief, April 2005
- 2.6. The following Village Design Statements and other documents have been adopted as a material consideration for development control:
- Shipbourne Village Design Statement (part adopted as SPG), February 2002
 - East Malling Village Design Statement, May 2004
 - Kent Downs AONB Landscape Design Handbook, January 2005
 - Plaxtol Village Design Statement, April 2005
 - AONB Management Plans for the Kent Downs and the High Weald (April 2009)
- 2.7. The following Supplementary Planning Documents have been formally adopted:
- Kent Design, July 2006 (supplementary to Core Policy CP24)
 - Affordable Housing SPD, July 2008 (supplementary to Core Policies CP17 and CP19)

Kent Design was originally adopted pursuant to Saved Local Plan Policy P4/11. This has now been superseded by Core Policy CP24 which has the same effect. It is therefore now regarded as being supplementary to the new policy.

- 2.8. In 2011/12 the Council continued work on preparing the Character Area Appraisals SPD pursuant to Policy SQ1 in the MDE DPD. This is being prepared as a series of separate volumes dealing with all of the main built-up areas in the Borough. It is being prepared in three tranches:

First Tranche

Tonbridge, Hildenborough and Hadlow	Public Consultation - 13 September to 22 October 2010	Adopted 17 February 2011
-------------------------------------	-------------------------------------------------------	--------------------------

Second Tranche

Borough Green, East Peckham, Snodland and Walderslade	Public Consultation – 11 th March 2011 to 21 st April 2011	Adopted 14 th July 2011
-------------------------------------------------------	----------------------------------------------------------------------------------	------------------------------------

Third Tranche

Medway Gap and West Malling	Public Consultation – 2 nd September 2011 to 14 th October 2011	Adopted 23 rd February 2012
-----------------------------	---------------------------------------------------------------------------------------	----------------------------------------

Gypsy and Traveller Accommodation Assessment

- 2.9. A joint Gypsy and Traveller Accommodation Assessment prepared with Maidstone, Tunbridge Wells and Ashford Boroughs in accordance with the advice in Circular 01/2006 (Planning for Gypsy and Traveller Sites) was published in June 2007, but this is now being updated. Salford University were jointly commissioned with Ashford and Gravesham Borough Councils in September 2012 to prepare new Assessments. The new assessment for TMBC was completed in April 2013 after which the results will be considered and if necessary plans put in place to address any identified need
- 2.10. The Government published a new Planning Policy for Traveller Sites on 25th March 2012 to be read in conjunction with the National Planning Policy Framework. The new assessments will reflect the new policy
- 2.11. New capacity is being provided as part of enhancements to one of the two KCC run authorised sites in the borough at Coldharbour Lane representing an additional 18 pitches bringing the total up to 26 pitches

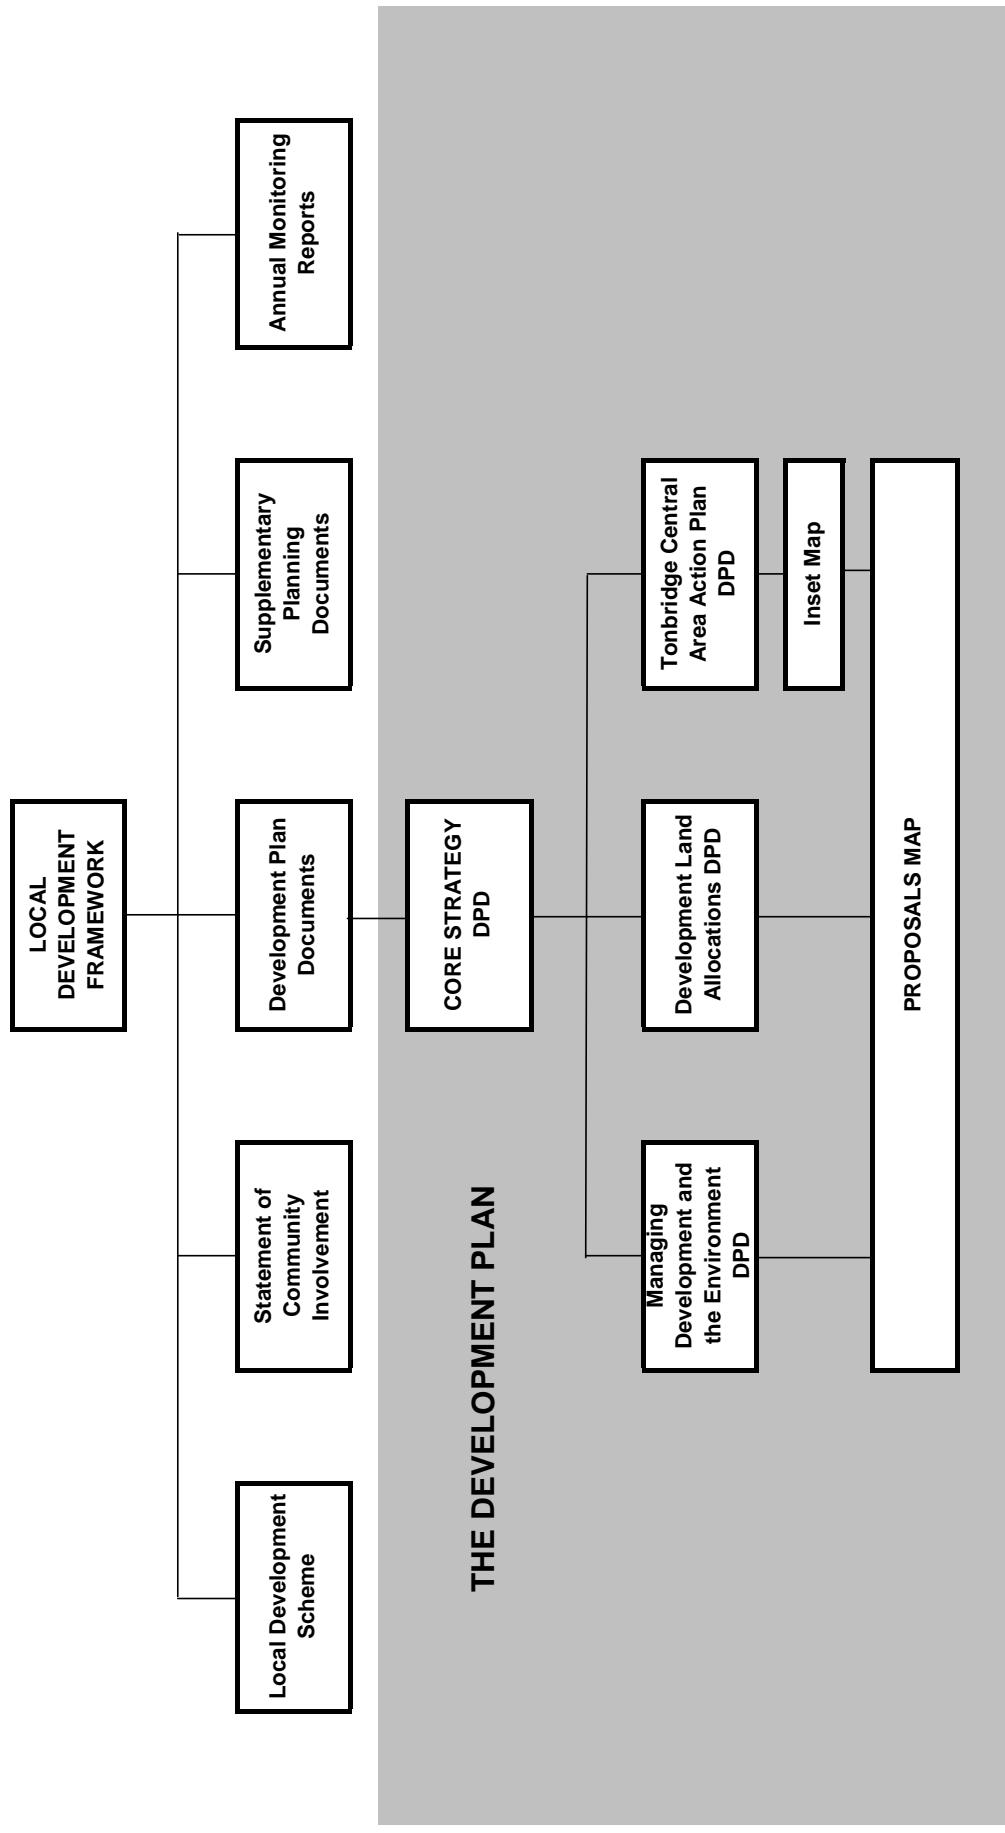

National Planning Policy Framework

- 2.12. The National Planning Policy Framework was published on 27 March 2012. This is a key part of the Government's reforms to make the planning system less complex and more accessible, to protect the environment and to promote sustainable growth.
- 2.13. The National Planning Policy Framework sets out the Government's planning policies for England and how these are expected to be applied. It sets out the

Government's requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities.

Figure 1 Local Development Framework Structure and Content

LOCAL DEVELOPMENT FRAMEWORK STRUCTURE AND CONTENT

SECTION 3 - LDF PERFORMANCE

PERFORMANCE INDICATORS

- 3.1. A set of 198 national Core Output Indicators was announced as part of the Comprehensive Spending Review 2007. These have since been reduced in 2009/10 by 18 indicators, and post 2010 a further 16 have been dropped. After 2012 it is expected that the central requirement to monitor all remaining indicators will be removed. At present, Local Authorities are also recommended to identify and monitor Local Output Indicators. These should address the outputs of LDF policies and should focus in particular on those aspects of the policies not covered by the DCLG Core Output Indicators. The set of Local Output Indicators has changed over time as the LDF has been prepared and as policies begin to be implemented.
- 3.2. Significant Effects Indicators are similar to Local Output Indicators in that they are identified by local authorities through the LDF. However, they are specifically linked to the Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) objectives and are intended to enable a comparison to be made between the predicted and actual effects of the implementation of LDF policies on the sustainability of the area. Notwithstanding the different purposes of the Local Output and Significant Effects Indicators, there is in practice, a good deal of overlap in the framing of the indicators. This reflects the way in which the Council has integrated the objectives established in the SA/SEA into the LDF documents. Taken together with the Core Output Indicators and Local Output Indicators, the Significant Effects Indicators allow a robust assessment of policy implementation over the life of the LDF.
- 3.3. The full details of the framework including the numbered indicators and data for the 2011/12 period can be found in Annex B. Where a time series already exists for an indicator this is also included. Otherwise, 2008/09 is normally the base-year where data exists. The tables also identify where indicators are not yet monitored. What is set out below is a selection of indicators which require a greater degree of analysis, commentary or explanation.

HOUSING

- 3.4. The South East Plan 2009 (SEP) covers the period from 2006 to 2026, although the coalition Government proposes to abolish the SEP, this AMR deals with the 2011/12 period during which time the SEP still formed part of the Development Plan. The SEP requires the provision of 450 units per year on average, which is a total of 6,750 units between 2006 and 2021 (the LDF Plan period).
- 3.5. Annex A sets out the housing trajectory for the Borough. The trajectory tracks the provision of housing supply over the lifespan of the adopted LDF (2006-2021). The purpose of the trajectory is to highlight the robustness and soundness of the overall housing strategy in the adopted DPD's and how it is performing in relation to the annualised housing requirements identified in the Local Development Framework. The trajectory highlights the following information:
- Past dwelling completion rates
 - Projected future dwelling completion rates (excluding windfalls)
 - Dwelling requirement – annual net additional dwelling requirement from the South East Plan from 2006 to 2021
- 3.6. The housing trajectory in Figure A2 is based upon the projected phasing of housing development as set out in Figure A1. Details of the phasing of all housing commitments are set out at the end of Annex A under Figure A5 and completions are under Figure A6. The trajectory also includes data on **managing** housing delivery in Figure A3 and on **monitoring** housing delivery in Figure A4. The manage line indicates the under or oversupply of dwellings at any one point. This is calculated by subtracting the completions to date from the total allocation and then dividing the answer by the number of years remaining in the LDF period. The monitor line demonstrates how many dwellings above or below the planned rate the Local Development Framework strategy is at any point in time. This is calculated by subtracting the completions from the annualised allocation from the South East Plan.
- 3.7. **Five Year Housing Supply** - Table A1 confirms that at 31 March 2012 Tonbridge and Malling Borough can demonstrate 135% of the SEP requirement for the next five year period to (2012/13-2016/17); an excess of 788 dwellings above the requirement.
- 3.8. **Housing Supply to 2021** - Table A1 can also confirm that at 31 March 2012 Tonbridge and Malling Borough can demonstrate 121% of the SEP requirement for the set plan period to 2021. Since the Plan began a total of 3,654 units have so far been completed. This level of supply is partly as a result of the Secretary of State's decision in November 2004 to support the Borough Council in granting planning permission for the development of three major sites at Kings Hill (750 units), Holborough Quarry (1,000 units with an additional 250 units permitted in 2009) and Leybourne Grange (723 units, including the conversion of a Listed Building and associated development). In May 2006 the Borough Council added to this by approving an outline application at Peters Pit for 1,000 dwellings.
- 3.9. The trajectory clearly illustrates the healthy land supply position for residential development in the Borough during the lifetime of the adopted LDF. However, it is recognised that recent economic circumstances have affected delivery and this is reflected in the significant downturn in completions since 2008/09. In the light of this, a relatively conservative estimate of projected completions has been assumed over the next few years, but only monitoring will confirm whether this in fact occurs.
- 3.10. Locationally, there had been a marked increase in recent years in the number of residential schemes within Tonbridge town centre, with a significant number of

dwellings completed in 2008/09 compared to previous years, but with a significant downturn in 2009/10. In 2011/12 only 61 units were estimated but 113 were actually completed which is well above the trajectory estimate.

- 3.11. As at the 31 March 2006 base-date of the Plan, Annex A in the Development Land Allocations DPD showed that planning permission already existed for some 4,606 dwellings which were due to be implemented during the Plan period. It was recognised that the yield on these sites could vary if revised planning permissions were granted. A number of significant planning permissions have been granted since 31 March 2006. As at 31 March 2012 there were 3,950 units with planning permission still to be implemented. The outstanding commitment at the end of each year has been decreasing, which is to be expected as the plan is implemented.

Year	2006	2007	2008	2009	2010	2011	2012
Number of outstanding units with planning permission	4,606	5,265	5,015	4,261	4,318	4,073	3950

- 3.12. Over the last 5 years these unimplemented planning permissions were mainly windfall permissions and the reserved details for Kings Hill, Leybourne Grange and Holborough, as well as the 1,000 dwelling outline permission at Peters Pit. In addition to these sites with planning permission there are also the unimplemented housing allocations in the Development Land Allocations DPD.
- 3.13. Land at Bushey Wood is identified as a broad Area of Opportunity for future development under Policy CP16. This land continues to be safeguarded.
- 3.14. The Peters Pit site is suitable for housing development and has planning permission which has been implemented. The progression of the scheme has been delayed while arrangements for delivering necessary infrastructure, most notably a new bridge over River Medway, have been put in place. These arrangements have now been positively resolved and there are currently on-going negotiations with the developers about possible phasing options. The phasing for land supply purposes is notional pending the results of those negotiations and has not been agreed with the developers. It is based upon a start on site in 2014/15 with the first completions in 2015/16. An average annual rate of 100 dwellings a year is typical of schemes of this size and has been adjusted to reflect a profile related to infrastructure provision and funding.

Percentage of new and converted dwellings on Previously Developed Land

- 3.15. Government policy requires new development (including conversions and change of use) to be focused on previously-developed land ('brownfield' sites), rather than undeveloped 'greenfield' land. The government previously set an explicit target in PPS3 (Housing) that 60% of all new housing development should take place on previously developed land. For this AMR the previous Government Guidance in the form of PPS/PPG was extant. The NPPF has replaced PPS3, and all the other PPS/PPG effective from 27/03/2012, but paragraph 111 continues to encourage the effective use of land and provides for the setting of targets locally.
- 3.16. Annex B shows that the former target of 60% has been significantly exceeded since monitoring of the LDF started. As from this monitoring period the figure is likely to reduce due to the change in national policy with regards to garden development,

which is no longer categorised as previously developed land. This indicator is now deleted nationally but is still monitored at local level in-house.

Housing Densities

- 3.17. 86% of the 444 dwellings completed in 2011/12 were built at a density of above 30 dwellings per hectare. 14% were built below this density. Of the 444 dwellings completed in 2011/12, 113 (25%) were completed in the Tonbridge Central Area, all of which were built at a density of above 30 dwellings per hectare.

Affordable Housing Completions

- 3.18. Many households are unable to secure an affordable home, either to rent or buy. Consequently the number of households seeking assistance through the Council's Housing Register remains high. During 2011/12 a total of 23 affordable homes were provided through the planning system and by direct provision by the Council's housing association partners.

Percentage of new dwellings of 3 or more bedrooms (in Tonbridge Town Centre)

- 3.19. None of the 113 units completed in Tonbridge Town Centre were 3 bedrooms or more during this AMR period. There were 62 x 1 bed and 51 x 2 bed. It must be noted that in previous years this indicator (TCAAP 2.2) was low due to inconsistency with data collection. This has now been rectified which will result in greater accuracy in this and future AMRs.

Number of Homeless Households (Statutory Homeless Households)

- 3.20. There is a significant drop of people on the homeless register for 2011/12 from 72 in the last monitoring period to 37 in this monitoring period. The Homelessness and Housing Options Service returning in-house has enabled the Council to take a more proactive approach to homeless prevention. But the economic downturn has meant that such people are both more at risk of becoming homeless and their situations are often harder to resolve, either due to the shortage of suitable accommodation or problems they may have sustaining tenancies.

Average House Prices

- 3.21. This data is taken from the Kent County Council's 'House Prices and Transactions' 2011 Annual Document. Overall, house prices have risen in 2011, but the price of semi-detached and terraced housing have gone down:

Tonbridge & Malling											
	Detached		Semi detached		Terraced		Flat/Maisonette		All dwellings		No
	£	No	£	No	£	No	£	No	£	No	
2006	428,260	678	239,311	908	191,577	791	184,762	342	265,679	2,719	
2007	440,471	729	259,610	880	214,236	859	178,426	387	281,135	2,855	
2008	442,890	298	249,916	370	203,923	398	192,735	241	269,366	1,307	
2009	411,893	352	227,373	458	181,180	398	173,280	167	254,670	1,375	
2010	476,340	420	261,343	542	204,216	437	171,509	172	293,095	1,571	
2011	492,385	418	255,325	556	201,759	419	179,874	198	294,111	1,591	

(Contextual indicator) House prices (£) and transactions	(Contextual indicator)
--------------------------------------------------------------------	------------------------

Number of Vulnerable Households living in a Decent Home

- 3.22. The Council is under a duty to assess the housing conditions in the borough. Guidance advises that this is best done by carrying out regular house condition surveys, usually once in every five years. The findings from the survey are essential to inform and support the Council's housing strategy, to provide information to complete the Housing Investment Programme submission to the DCLG and to meet the requirements of the Home Energy Conservation Act 1985 as well as inform this indicator. The Council's latest House Condition Survey was published in October 2006, and provides base-line information.
- 3.23. The 2006 House Condition Survey demonstrates that excellent progress has been made within the borough in improving the housing stock. The survey findings indicate that the 2021 Decent Homes Target has already been achieved and exceeded and that the rate of unfitness in the borough has been halved.

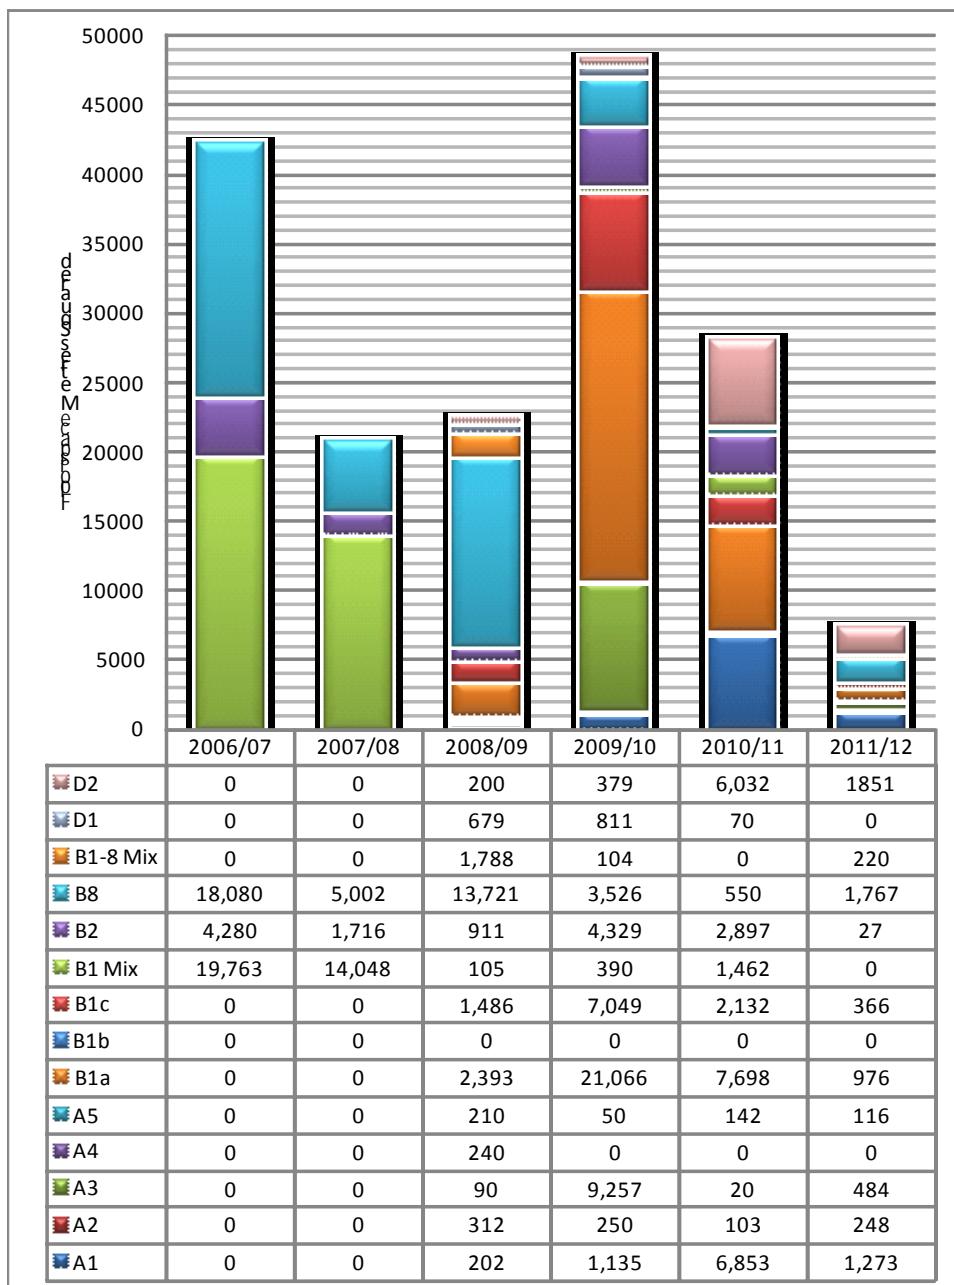

Housing Benefit and Council Tax Claimants

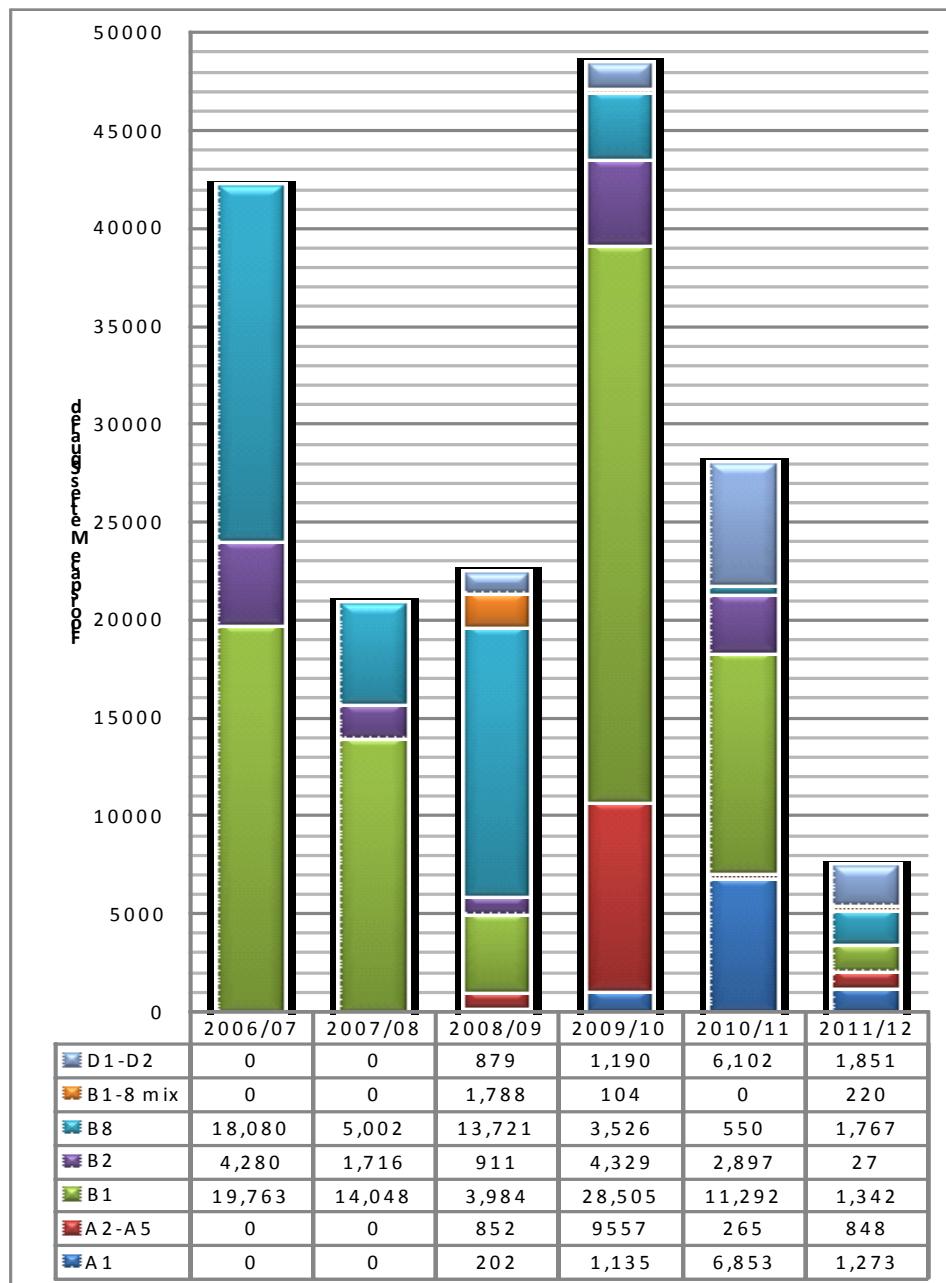

- 3.24. Due to the economic downturn the claimants increased considerably making it the highest results since monitoring began.

COMMERCIAL & ECONOMIC DEVELOPMENT

3.25. Audits of commercial land are produced for each local authority in Kent, on a yearly basis by Kent Country Council in conjunction with the districts. They provide information on the number of completions by use class, rates of development set out in Development Plan Document and planning permissions on a site-by-site basis including those developments completed, not started or under construction. Please note that the figures look slightly different to previous AMR's due to additional use classes added to ensure accuracy.

Amount of Land Developed for Employment by Type

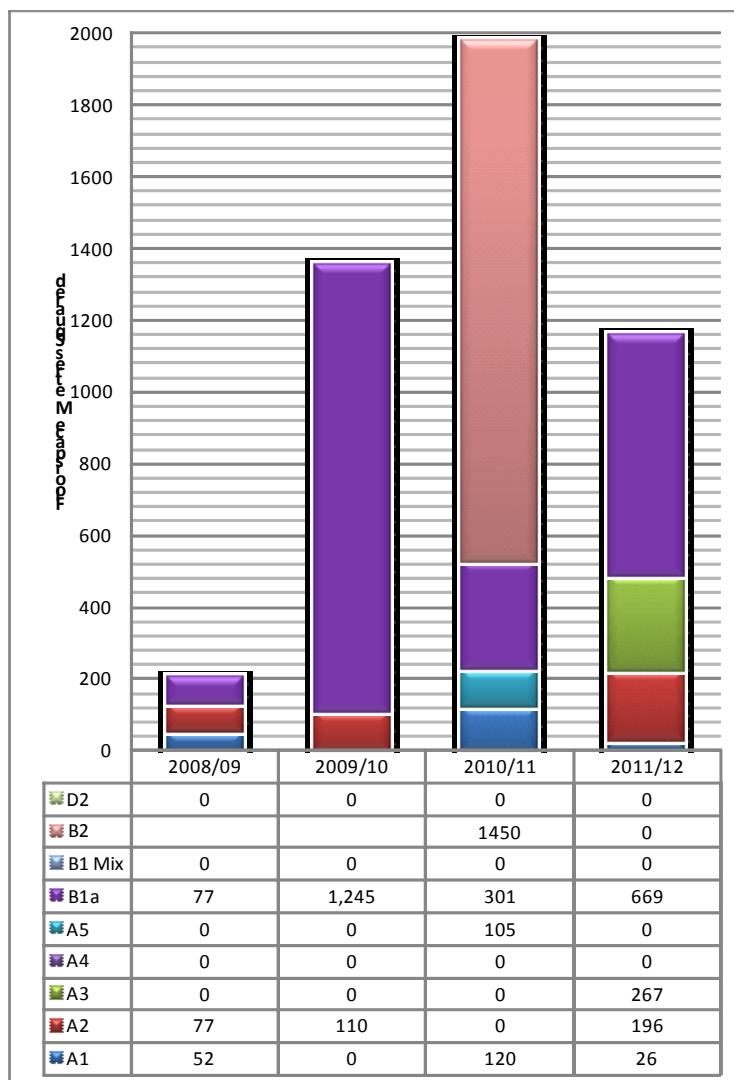

- 3.26. During 2011/12 7,328m² of gross floorspace was developed for employment within the Borough. Representing a significant reduction over previous years and only 17% of the peak in 2009/10. This is partly due to the effects of the economic recession and also due to the lack of large developments during 2011/12. However 2011/12 saw 94 planning permissions for commercial/retail which is 40% more than 2010/11. Importantly, in terms of the target, there has overall been no net loss of employment land since the base date of the plan.

Percentage of floorspace by employment type, which is on Previously Developed Land

3.27. 96% of completions were on previously developed land.

Amount of completed Retail, Office and Leisure development (with the percentage for Tonbridge Town Centre)

3.28. For this monitoring period, out of the completions shown below 489m² (23%) of A1-A5 uses (retail/restaurant) and 669m² (49.8%) of B1 (office) uses took place in the Tonbridge Town Centre.

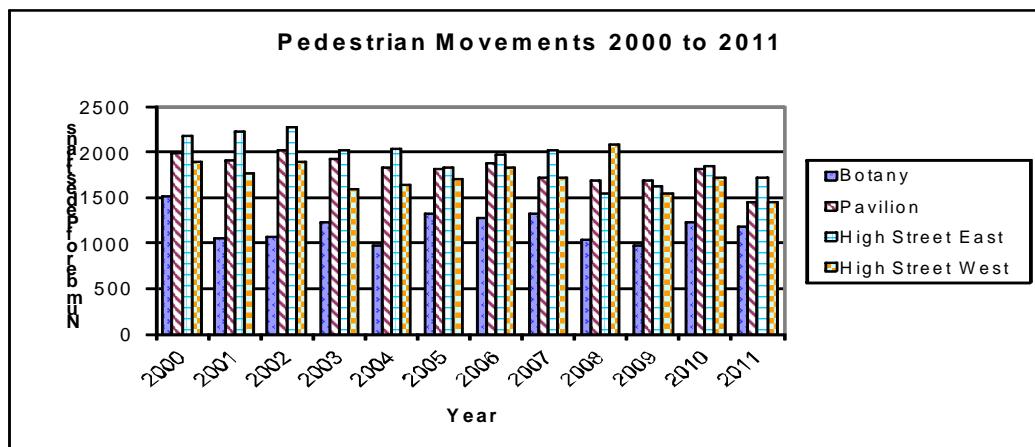

Tonbridge Town Centre - Pedestrian Flows

3.29. Pedestrian counts have been undertaken in Tonbridge town centre on roughly the same dates and in the same locations over the past 11 years. Pedestrian counts help to give a general indication of the amount of activity in the High Street and of the relative concentrations of retail activity. The table and diagram below illustrate pedestrian movements numbers recorded for Tonbridge for the years 2000 to 2011.

Pedestrian Movements 2000 - 2011

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
Botany	1508	1055	1061	1228	967	1321	1273	1318	1034	968	1228	1179
Pavilion	1992	1909	2016	1917	1826	1807	1878	1724	1693	1685	1804	1440
High Street East	2173	2229	2274	2021	2031	1823	1967	2018	1545	1623	1848	1711
High Street West	1891	1767	1883	1587	1643	1705	1832	1723	2084	1549	1718	1444
Total	7564	6960	7234	6753	6467	6656	6950	6783	6356	5825	6598	5774

The results for 2011 show that total pedestrian activity in the town centre has decreased slightly since 2010. It is, in fact, showing a general downturn in the Botany and High Street West areas

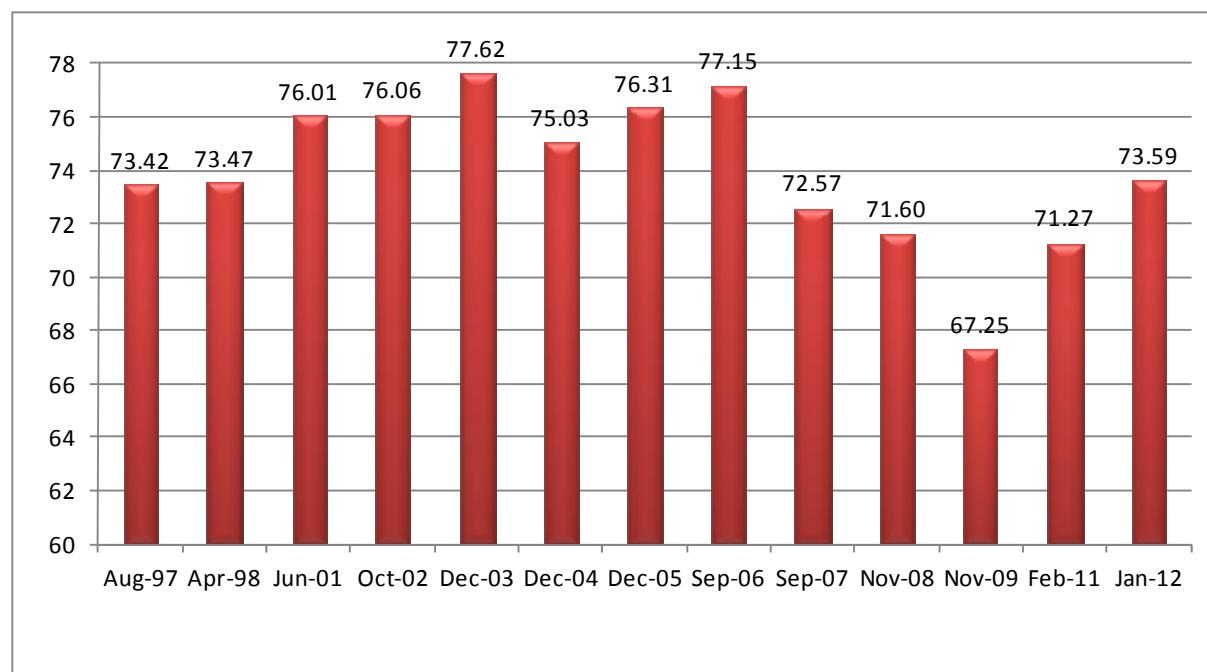

Tonbridge Town Centre - Vacancy Rates

- 3.30. The number of vacant properties in a town is one of a number of indicators of how vibrant the centre is. The diagram below illustrates vacancy rates for both the upper and lower parts of the High Street.
- 3.31. The lower part of the High Street has historically experienced significantly lower vacancy rates than the Upper High Street. For 2011 the vacancy rates of 5.04% for the Lower High Street has decreased slightly from last year but at 12.66% for the second year running, the vacancy rates in the Upper High Street are notably lower than the last 3 years, but still higher than in 2006 which is likely to be due to the impact of the recession on local businesses in this more marginal retail area.

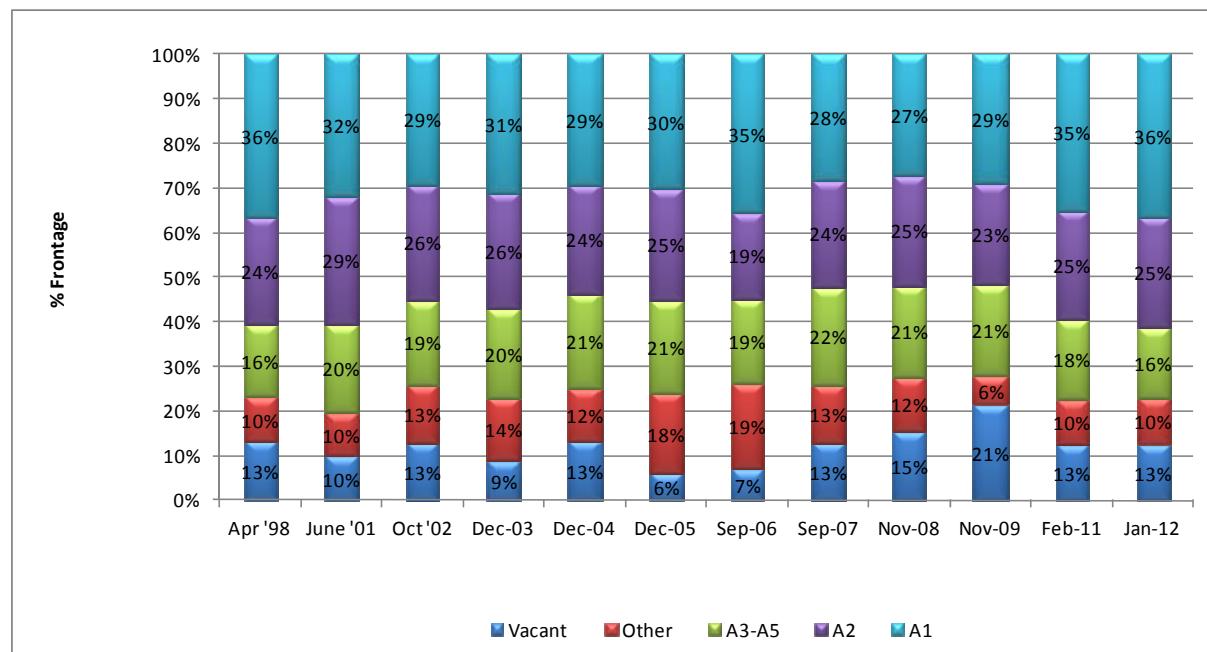

Percentage of retail frontages in central Tonbridge

- 3.32. Performance Indicator 1.5 aims to monitor the primary retail function of the town centre shopping areas. For 2011, 73.59% of the frontages in the Lower High Street area were in retail (A1) use. This figure has bounced back since the start of the economic recession and shows a marked improvement since the 2009/10 and 2010/11 monitoring periods.

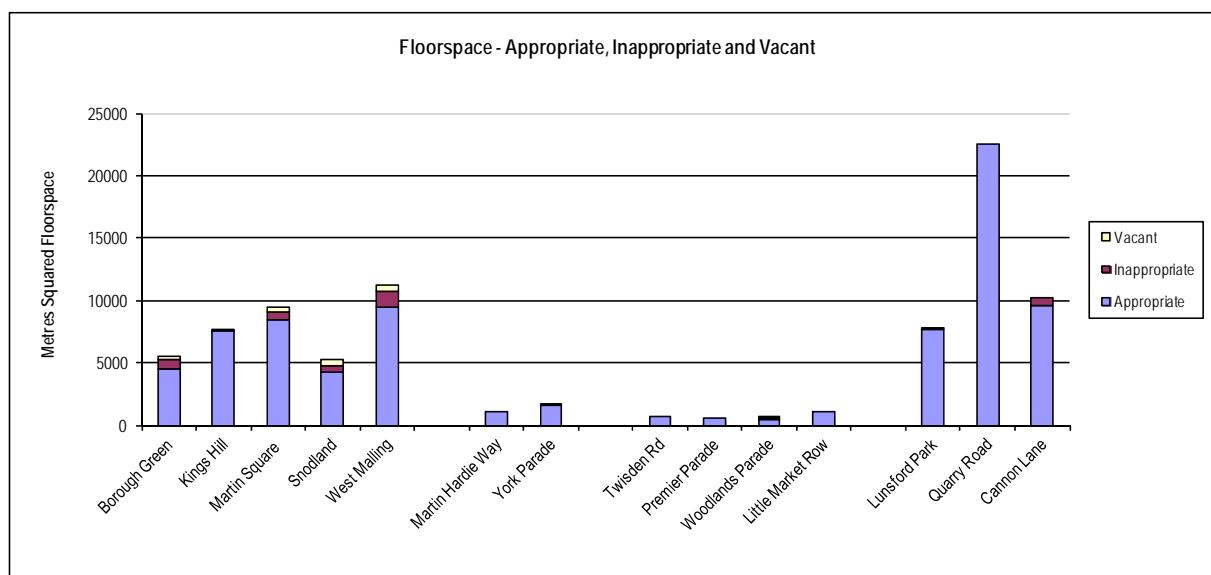

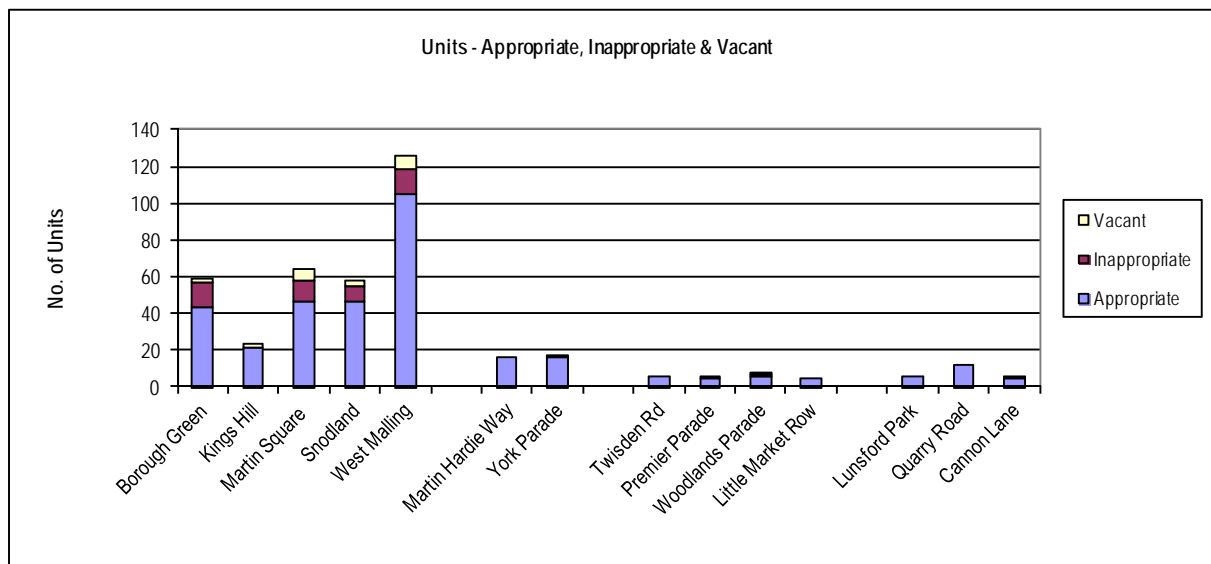

- 3.33. The chart below shows the use class split in the Upper High Street area. Whilst vacancy rates are considerably lower than in previous years, the relative proportions of occupied uses are fairly constant, with little change year on year.

Amount of inappropriate ground floor uses in District and Local Retail Centres

- 3.34. Appropriate uses within District and Local Centres (as defined in Policy R1 of the DLA DPD) are set out in Annex A of PPS 6 – Planning for Town Centres. This includes the range of shops and services to meet the day to day needs of a community such as banks, shops, post offices, libraries and community centres. The aim of the indicator is to identify the amount of inappropriate uses in terms of the number of units and amount of overall floorspace in each of the centres identified in Policy R1. For the purposes of monitoring, “inappropriate uses” are defined as B2 (industrial), B8 (warehousing) and C3 (ground floor) residential uses. It should be noted that, whilst technically “inappropriate”, they may not be unacceptable uses. The following charts also identify the number of units and amount of floorspace which is vacant, since this is also a good indicator of the health of a centre.

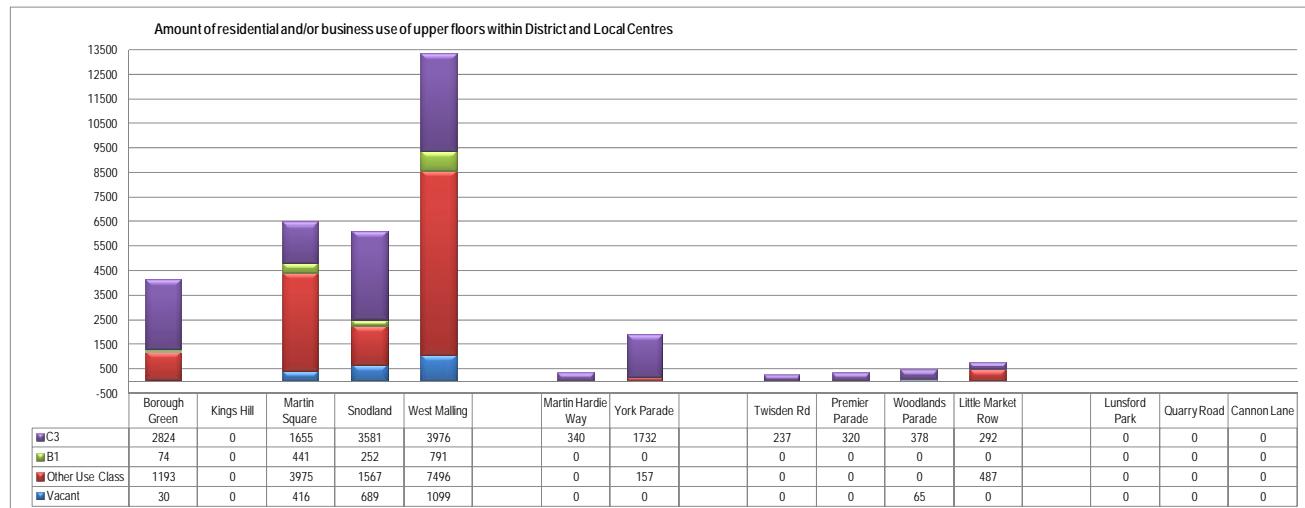

- 3.35. From the above graphs, and the detailed tables in Annex B, it can be seen that of the 85,362m² of floorspace in the retail centres combined, 79,380m² is in appropriate uses, 3,864m² is inappropriate uses and 21,187m² is vacant. This shows that 93% of the total district supply is appropriate use, leaving only 4.5% in inappropriate use and 2.5% vacant. This compared with the previous year of 2010/11 shows that there was no change of appropriate use, a decrease from 5% to 4.5% inappropriate use and an increase from 2% to 2.5% in Vacant uses. It must be noted that there was an error

with the 2009/10/11 figures which resulted in a double count of floorspace and 1 unit extra. This has been rectified showing a difference of 364m² of total floorspace in Snodland and 1,684m² of upper floorspace in Martins Square.

- 3.36. When looking at the centres individually, it can be seen that it is the District Centres where most of the inappropriate units are sited. Vacancy rates have actually increased and may increase more if the economic situation does not improve. Ground floor residential units are the main type of "inappropriate", though not necessarily unacceptable, uses in the District Centres.
- 3.37. The District Centres show a good mix of retail and office uses, whilst the Tonbridge Urban Local Centres, Medway Gap Local Centres and Out of Centre Retail Areas show a predominance of retail uses (Classes A1-A5). Even though the economic downturn has hit many businesses over the last year, the vitality and viability of the retail areas monitored under Policy R1, seem to be as healthy as can be expected in such circumstances.

Amount of residential and/or business use of upper floors within District and Local Centres

- 3.38. The tables in Annex B for use classes on the first and second floors show the number of units and approximate floorspace for each retail policy area. The graph below shows that places such as West Malling, Martin Square and Kings Hill have a higher floorspace of 'other uses' above ground floor including retail. A Higher rate of vacant floorspace seems to be in West Malling and Snodland and a higher proportion of residential and business uses are now in Martins Square, Borough Green, York Parade and West Malling. Both Borough Green & West Malling centres are much larger and this is reflected in the higher amount of vacancy/other uses on first and second floors. In the case of the Local Centres residential is the predominant use of upper floors.

TRANSPORT

Number of cycling routes and length of cycling routes in Tonbridge completed

3.39. These Indicators are not yet monitored. A draft Cycling Strategy for the Borough has been produced by Kent County Council with support from the Borough Council which is currently being updated. Once it is finally adopted, the proposals it contains will be monitored. The draft Strategy proposes two regional routes and has 46 recommendations for the provision of links, paths and other cycling facilities within the Borough.

RECREATION & COMMUNITY FACILITIES

3.40. Leisure and Arts is largely a non-statutory service but it plays an essential role in assisting the Council to meet some of its key corporate priorities.

Number of principal Public Open Spaces that have a Management Plan in accordance with the Green Flag Award

3.41. In this monitoring period four out of the target of four public open spaces have a management plan. These were at Leybourne Lakes Country Park, Haysden Country Park and Tonbridge Racecourse Sportsground. At present two of the parks have the Green Flag Award, which are Leybourne Lakes and Haysden.

Percentage of users who are satisfied with the Council's principal Public Open Spaces

3.42. This monitoring period showed that 99% were satisfied, which meant that the target of 85% was exceeded. However, it must be noted that this indicator is measured at different sites each year.

Number of tickets sold for the Tonbridge Castle Festival of Music and Fireworks

3.43. This Indicator is a local Significant Effect Indicator from the SA/SEA. This monitoring period shows that 881 tickets were sold, falling some way short of this year's target of 1,000 sales; perhaps a reflection of the recession.

Number of visitors to Key Tourist Attractions in the Borough

3.44. There are eight key tourist attractions in the Borough.

- Tonbridge Castle
- Ightham Mote
- The Hop Farm
- Aylesford Priory
- Broadview Gardens
- Great Comp Gardens
- Downderry Nursery
- Nepicar Farm

3.45. Visit Kent produce 'The Business Barometer' which is a monthly snapshot of tourism business performance in Kent. The Borough only has three of the attractions contributing to the Barometer; Downderry Nursery, Ightham Mote and The Hop Farm. You can access the performance indicators here:

<http://www.visitkentbusiness.co.uk/index/research-development/Business-Barometer/Business-Barometer-2012/>

ENVIRONMENT

- 3.46. Tonbridge & Malling has a high quality environment with some of the most beautiful landscapes in the county. It is not surprising therefore that, residents, landowners, statutory and other bodies place a high value on the local environment, and wish to see it protected and well managed. For the purposes of this section, 'environment' encompasses both the countryside and the built environment of towns and villages as well as air and water quality, flooding and waste management.

Number of planning permissions granted contrary to the advice of the Environment Agency on either flood defence or water quality grounds

- 3.47. During the AMR period the Environment Agency had no objections to any application on water quality grounds. However there was one for the following development but has since been resolved:

TM/11/02522/FL - Proposed phased site redevelopment involving the demolition and replacement of 2 No warehouse/workshop/office buildings - Unsatisfactory FRA/FCA submitted (Surface Water) Land North Of River Medway, Branbridges Road East Peckham

Number of properties at risk from flooding

- 3.48. Several locations are in flood risk areas, for example Tonbridge Town Centre and parts of Hildenborough, East Peckham, Aylesford, Snodland and Woudham. The Environment Agency figures had shown a year on year increase from 2006. However, due to the change in the flood maps this monitoring period, the figure has been reduced significantly which creates a new base-line for monitoring

Change in Priority Biodiversity Action Plan (BAP) Habitats

- 3.49. This Indicator is not monitored annually. Survey work for the ARCH project is being undertaken which will be reported in the 2013 AMR. Kent Biodiversity Partnership project led by KCC in collaboration with partners are undertaking this project.

Level of population of wild birds

- 3.50. The RSPB webpage has a series of reports with information on the population of birds. Many sources of information are used to produce an up-to-date overview of the health of bird populations in the UK and its Overseas Territories. The state of the UK's birds' report 2008 was published in 2009 and contains results from annual, periodic and one-off surveys and studies from as recently as 2008.

<http://www.rspb.org.uk/ourwork/science/sotukb/index.asp>

Percentage of SSSI's in Favourable Condition

- 3.51. This is the fourth year of monitoring the SSSI's in favourable condition and shows that from the baseline data of 65%, in 2010/11 75% and in 2011/12 80% of SSSI's are now in favourable condition.

Extent of Ancient Woodland

- 3.52. This is the third year of monitoring the Extent of Ancient Woodland. However, the Council had commissioned a comprehensive study of Ancient Woodland in the Borough which was published in the spring of 2010. The results of this study set a

new benchmark for monitoring. The aim is for there to be no loss of Ancient Woodland. The recorded area of ancient woodland, as the result of the new resurvey, is 2,621 ha which is just under 11% of the Borough which is now the baseline for monitoring.

Installed capacity for energy production from Renewable Sources

- 3.53. Policy CP1 in the Council's adopted Core Strategy seeks to achieve high quality sustainable development in the borough. In support of achieving this policy, the Council has produced several technical guides on renewable energy technologies that potentially can be incorporated into developments. These guides outline how the technology works, what the benefits are and when and where it is suitable. The guides also provide sign posts to organisations who can offer expertise and detailed practical advice, including information on available grants. The guides cover Photovoltaic's, Solar Water Heating, Wind Power, Biomass and Ground Source Heat Pumps. In this monitoring period there has been grant funding for 12 solar hot water and two Renewable Energy Assistance grants to provide log burners, one with a back boiler connected. This is a difficult Indicator to monitor because not all installations require any form of permission and therefore no contact with the Council. Take-up of grant-assisted schemes has so far been slow. For details of the Guides go to:

<http://www.tmbc.gov.uk/services/environment-and-planning/planning/local-development-framework/ldf/3172>

Area under Countryside Stewardship Schemes

- 3.54. The 'Countryside Stewardship Schemes' have been replaced by the Environmental Stewardship Programme. The monitoring Indicator will be adjusted accordingly.

<http://www.naturalengland.org.uk/ourwork/farming/funding/es/default.aspx>

Net percentage of land in the Green Belt that has been developed

- 3.55. Nearly three-quarters of the Borough lies within the Green Belt. The boundaries of the Green Belt were set in previous local plans and were carried forward with mainly minor changes into the LDF. The only significant change was the release of Isles Quarry West at Borough Green from the Green Belt. The LDF also identifies existing major developed sites within the Green Belt where infilling or redevelopment may be permitted. Those which were not already implemented were carried forward from the adopted Local Plan and are now identified in the Development Land Allocations DPD under Policy M1. No new housing or commercial development was completed in the Green Belt during 2011/12

Preserving the special character of Conservation Areas - Total number of Conservation Areas

- 3.56. A Conservation Area is an area of special architectural or historic interest the character of which it is desirable to preserve or enhance. There are 60 Conservation Areas in the Borough.

Preserving the special character of Conservation Areas - Percentage of Conservation Areas with an up-to-date Conservation Area Appraisal

- 3.57. During the 2008/09 monitoring period the Council undertook a review of the Conservation Area Appraisal for Tonbridge which included boundary changes. These boundary changes were finally approved on 14 July 2009. During 2009/10 a Conservation Area Appraisals of the Quarry Hill, Tonbridge Conservation Area was completed which included boundary changes which were adopted by Council on 19 November 2009. Appraisals for the Conservation Areas at Hadlow and Hildenborough were adopted in November 2010. During this monitoring period, Conservation Area Appraisals for Bullen Corner were approved in June 2011, Larkfield Church, Cobdown Farm, Ditton and Holtwood in Aylesford had been approved in November 2011.

Heritage Assets at Risk

- 3.58. English Heritage has a register of Historic Buildings at risk. There is only one listed building registered as being at risk in the Borough which is Hadlow Tower. The Council compulsorily acquired the Tower and transferred it to the Vivat Trust early in 2011 and work has now started on its restoration.
- 3.59. Of the 30 ancient monuments at risk in Kent, three are in the Borough – a Romano-British Villa, Anglo Saxon Cemetery & Associated remains at Eccles, the Chapel of St Blaise, Offham and the Town Banks, Tonbridge. The first two are threatened by agricultural practices beyond the Council's control. The Borough Council does not consider the Town Banks to be under threat. They will be protected and enhanced in association with proposed development on adjacent land.

Extent to which the Council keeps on schedule in measuring and reporting on levels of air, land and water pollution

- 3.60. The monitoring period of 2011/12 showed 98% of the Indicators were kept on schedule and monitored. All essential sampling had been carried out, including air quality and private waters.

Preserving Local Character - Number of Locally Listed Buildings

- 3.61. Locally Listed buildings are those that make a contribution to the historic environment but with a focus on their local rather than national importance. It is the intention that a draft compendium of Locally Listed Buildings will be prepared in consultation with local groups and organisations to ensure a local dimension is given to the conservation of the Borough's historic heritage. Once established, this list will form the basis of future monitoring.

Number of Air Quality Management Areas (AQMAs)

- 3.62. Where a local authority considers that one or more of the air quality objectives is unlikely to be met it must declare an Air Quality Management Area covering the part of the area where the problem lies. Having declared an Air Quality Management Area the local authority must draw up an Action Plan setting out what it will do to meet the objectives within the area. Six Air Quality Management Area's have been identified in the Borough:
- M20 between New Hythe Lane, Larkfield, and Hall Road at Aylesford,
 - Tonbridge High Street (southern end),
 - A26 Tonbridge Road/Red Hill junction in Wateringbury,

- London Road/Station Road junction at Ditton,
 - London Road in Aylesford and
 - London Road, Larkfield/Ditton.
- 3.63. The Council is currently in the process of officially declaring an AQMA in Borough Green for Sevenoaks Road from the junction with Western Road to the junction with the High Street and as a precautionary approach the Council may seek to include the High Street and Western Road within the AQMA.
- 3.64. The Council continues to monitor air quality through an ongoing process of Updating and Screening Assessments and, where warranted, Detailed Assessments, and works with the Kent & Medway Air Quality Partnership to secure a coordinated approach to the monitoring and improvement of air quality in Kent.

CO₂ Emissions

- 3.65. There is no result for NI195 for 2011/12 as the base year on which to calculate a percentage reduction has yet to be published. The Council's Climate Change Strategy includes a 10% target for reducing CO₂, NOx and PM10 emissions over three years, including 2009/10.
- 3.66. The result for Indicator NI186 is provided by the Department of Energy & Climate Change (DECC). The Council's target is to reduce CO₂ emissions by 11.2%, or 0.87 tonnes, over the period 2008/11. The base figure of 7.8 tonnes in 2007/08 is the only available statistics at present. The Council's targets for NI186 have been set in line with the former Kent Agreement 2.

<https://www.gov.uk/government/organisations/department-of-energy-climate-change/series/sub-national-greenhouse-gas-emissions-statistics>

Days when Air Pollution is Moderate or High

- 3.67. The main source of air pollution in the borough is road traffic emissions from major roads, notably the M20, M26, M2, A20, A21, A25, A26, A227, A228 and A229. The six Air Quality Management Areas relate to road traffic emissions of nitrogen oxides and, in one area (M20 corridor), additionally particulates (PM₁₀). Other pollution sources, including commercial, industrial and domestic sources, also make a contribution to background pollution concentrations. Results of this can be found in the annex.

Rivers of Good or Fair Chemical and Biological Water Quality

- 3.68. This indicator has not been monitored in previous years. The rivers that are of good or fair chemical and biological water quality in Tonbridge and Malling can be viewed on the Environment Agency's website at:

http://maps.environment-agency.gov.uk/wiyby/wiybyController?x=357683.0&y=355134.0&scale=1&layerGroups=default&ep=map>extonly=off&lang=_e&topic=riverquality#x=562867&y=145187&lq=2,7,&scale=4

Percentage of Household Waste Arisings which have been sent by the Authority for Recycling and for Composting (excludes home composting) or treatment by Anaerobic Digestion

3.69. During the previous monitoring period the original two Indicators had been replaced by indicator NI192 - percentage of household waste sent for reuse, recycling and composting. In 2011/12 the figure was 44.33%, which has fallen by 0.7% on the previous monitoring period.

Percentage change from the previous financial year in the number of kilograms of Household Waste collected per head of population

3.70. During the previous monitoring period this Indicator was replaced by indicator NI191 'Kilograms of residual household waste per household'. For 2010/11 the figure was 544kg. This is 20kg per head lower than the figure for the previous year.

SECTION 4 - LDF IMPLEMENTATION AND DELIVERY

- 4.1 Annex C shows progress with the implementation and delivery of all site-specific proposals in the Core Strategy, the Development Land Allocations DPD, Tonbridge Central Area Action Plan and Managing Development & Environment DPD.

CORE STRATEGY

- 4.2 The Core Strategy section of Annex C monitors policies CP4, CP15, CP16 and CP18.
- 4.3 In accordance with the advice contained in Annex B of PPG2 (Green Belts), and to ensure that the boundaries of the Green Belt will endure, the Council specifically excluded certain sites from the Green Belt around Tonbridge and at Hadlow, and Wrotham so that they could remain available to meet the long-term development needs. The following areas are defined as Safeguarded Land under Policy CP4 and are reserved for future development.
- North of Lower Haysden Lane, Tonbridge;
 - North of Dry Hill Park Road, Tonbridge;
 - Carpenters lane, Hadlow;
 - Land at Howlands Allotments, Wrotham.

They will not be released for development before 2021 other than through a review of the Local Development Framework and only then if there is a demonstrable shortfall of housing land relative to the prevailing requirements of the Core Strategy. These sites remain safeguarded.

- 4.4 CP15 shows that all four major sites at Kings Hill (estimate of 1,460 units), Leybourne Grange (702 units), Peters Pit (1,000 units) and Holborough (estimate of 1188 outstanding units and a further 62 units completed prior to the monitoring of the plan period), have planning permission, and are at various stages of development. A total of 3,223 units are complete to date (including those units complete prior to the plan period) out of the total of 4,350 units (during the plan period), the majority of these being at Kings Hill. During the monitoring period 22 units were completed at Leybourne Grange, 100 units at Holborough Quarry, 90 units at Kings Hill and at Peters Pit some advanced ground works were undertaken.
- 4.5 Land at Bushey Wood was identified in the Tonbridge and Malling Borough Local Plan as a broad Area of Opportunity for future development. For the current LDF it is unlikely that there will be a need for further housing land to meet strategic requirements up to 2021 and, there is no need to firmly allocate any land at Bushey Wood during the plan period. It has therefore been carried forward as Policy CP16, and remains safeguarded for long-term development beyond the time horizon of the LDF.
- 4.6 CP18 Isles Quarry West, please see policy H2 of DLA DPD

DEVELOPMENT LAND ALLOCATIONS DPD

- 4.7 The DLA DPD section of Annex C monitors Policies H1, H2, H3, H4, E3, M1, S1, S2 and S3.
- 4.8 Policy H1 will yield a total of 191 units, of which the permission for the Oil Depot at Station Road Aylesford for 14 dwellings was not started, and Land at Snodland Station also had permission for 14 units which was completed this monitoring period
- 4.9 Policy H2 (Isles Quarry West) will yield 200 units. The site has been marketed and pre-submission discussions and public consultation on a draft scheme has taken place. Planning applications was received during 2011/12 monitoring period for approximately 244 units on the site under planning references 12/02439/OA, 12/02444/FL and 12/02443/OA.
- 4.10 Policy H3 has a 180 unit planned capacity. The Health Authority is undertaking some preliminary master planning work in conjunction with Royal British Legion Industries who jointly own the site. A planning application was received in the 2012/13 monitoring period.
- 4.11 Policy H4 includes a number of sites which may or may not come forward during the plan period. They are all suitable for housing and in total will yield some 328 units. None were completed during this AMR period but one permission was granted on the site of the former Petrol Filling Station at 2 London Road, Leybourne for 24 units which is under construction
- 4.12 The Employment Land Review (July 2005) sets out a baseline for employment land provision in the Borough. The aim is to retain the level of provision existing at the base date of the plan. Policy E3 identifies large vacant sites (in excess of 0.5 ha) potentially available for employment development within the areas identified for employment use under Policies E1 and E2. Some of these already had planning permission at the time of adoption of the plan. Other opportunities will arise from the redevelopment or intensification of use on existing employment sites. There were no completions on any E3 sites during the monitoring period.
- 4.13 With regards to Major Developed Sites in the Greenbelt, PPG2 advises that where major development exists within the Green Belt, the Local Plan may identify such sites and apply appropriate policies to them. There are a number of major developed sites within the Green Belt in the Borough that it is appropriate to treat in this way. These are listed in Policy M1. There were three permissions granted and one completion during the monitoring period, a retrospective permission for B8 gain of 183m², B1-B8 gain of 2646m² and B1c gain of 240m².
- 4.14 Policy S2 safeguards land for parking at West Malling Station. This is now complete and operational.

TONBRIDGE CENTRAL AREA ACTION PLAN

- 4.15 The TCAAP section of Annex C monitors Policies TCA10, TCA11, TCA12, TCA13, TCA14 and TCA16.
- 4.16 Policy TCA10 has seen a scheme designed and approved for the Town Lock area of Tonbridge. This has now been designed to conceptual level. No progress has been made on the other Public Realm Priorities.
- 4.17 There are ten outstanding planning permissions under policy TCA11, of which two were completed in this AMR period.
- 4.18 Policy TCA12.3 saw the first phase of the Lansdowne Road Link completed during the 2009/10 monitoring period as part of the development of the Cattle Market site. No other progress has been made on any other transportation measures including pedestrian priority measures under Policy TCA13.
- 4.19 Policy TCA14 'Tonbridge Station Interchange Enhancement'. A proposal by Network Rail is now included in the DfT funded National Station Improvement Programme. Design work is underway by Network Rail. Further work will ultimately be carried out by Kent County Council as Highway Authority but this is not yet programmed.
- 4.20 Policy TCA16 saw no progress during the monitoring period on new parking provision.
- 4.21 The 'Outstanding Planning Permission' section of Annex C monitors the progress of a total 588 housing units which had planning permission at the base-date of the Plan under 12 separate planning applications in Tonbridge Central Area. As at 31st March 2012 a total of 471 of these units had been completed since 2006, 117 had not started and none were under construction. Of the 588 units, 101 were completed during the AMR period.

MANAGING DEVELOPMENT & ENVIRONMENT DPD

- 4.22 The Managing Development and Environment DPD (MDE DPD) was adopted by the Council in April 2010. This completes the suite of adopted DPDs that together make up the Council's Local Development Framework. It includes a range of policies aimed at managing development so that environmental quality is maintained and enhanced whilst preserving a sense of place. It is supplemented by the Character Area Appraisals SPD which identifies locally distinctive features in need of protection and enhancement within the settlements defined by policies CP11 and CP12 in the adopted Core Strategy. Due to the recent adoption date of the MDE DPD, systems for effectively monitoring the performance of most of the policies contained with the MDE DPD have not yet been fully established.

SECTION 5 - CONCLUSIONS

HOUSING

- 5.1 For the third year running, housing completions fell short of the annual SEP requirement. The total number of dwellings completed in the Borough on all sites in the year ending 31st March 2012 was 444 units, bringing the total number of dwelling completions since the beginning of the LDF period to 3,654. The SEP requirement up to 2021 is 6,750 dwellings. The residual requirement is therefore 3,096; an annual residual requirement of 344 units a year which is much lower than the average rate of construction over the past few years which means that the overall requirement should easily be met, particularly when the economy recovers. Furthermore, the housing trajectory demonstrates that by the end of the LDF period (2021) the amount of housing completions will have exceeded the SEP requirement, not taking account of any windfall development or allocations which might be permitted between 2012 (post 31/3/2012) and 2021. The NI159 **Five Year Supply (2012/13 to 2016/17)** is 35% in **excess of the SEP requirement**. Clearly, the housing land supply position in the Borough is relatively healthy and will be ready to respond to the market upturn when it occurs.
- 5.2 The Government's target that 60% of all new housing development should take place on previously developed land is comfortably being met with the figure for 2011/12 being 98.7%. This figure is back on par with previous years although it must take into account that it may be lower in future years due to the amendment of PPS3 and the exclusion of 'development in residential gardens' in the definition of 'previously developed land', and therefore a change in monitoring of back garden development.
- 5.3 The overall amount of affordable housing completions for 2011/12 is approximately 30% above the Local Performance Indicator target. Despite the current economic downturn, average property prices within the Borough remain high compared with the South-East region overall.

EMPLOYMENT

- 5.4 There is still a healthy employment land supply position with the largest concentration of available land being at Kings Hill. In terms of meeting the target there has been no net loss of employment land since the base date of the plan. The main category of employment development that has been implemented in the monitoring period is B1 Business Offices.

TONBRIDGE TOWN CENTRE

- 5.5 There is some improvement in the health of Tonbridge town centre with vacancy rates in the Upper High Street Area staying at 12.66%. The level of pedestrian activity in the High Street has reduced slightly since 2010 and is still at one of its lowest levels since monitoring began in 2000. The percentage of frontages in the lower High Street area that were in retail use in 2010 increased slightly to 73.59% from the previous year's 71.27%. The percentage of retail uses in the Upper High Street is similar to last year with little change to A2 (office) and A3-A5 (food/restaurant) uses which continue to support the vitality of the area in the evenings.

COMMUNICATIONS INFRASTRUCTURE

- 5.6 Progress on the implementation of transport schemes within the Borough is slow. A number of the schemes identified in the Plan are development-related which means that their implementation is tied to the investment decisions of developers and landowners. Contributions to open space provision are being pursued through the implementation of policy OS3 in the MDE DPD. The implementation procedure being followed by the Council is set out in Annex D to this plan.

LOCAL DEVELOPMENT FRAMEWORK

- 5.7 With the adoption of the MDE DPD in April 2010 the Development Plan Documents which together comprise the LDF are complete. Following the publication of the NPPF in March 2012 a review of the LDF has begun and a new Local Plan will be prepared over the next few years. This will then dictate the review of the Local Plan and the update of the evidence base in due course.

MONITOR - No. dwellings above or below cumulative allocation															
MANAGE - Annual requirement taking account of past/projected completions	400	789	1137	1059	960	954	1021	1150	1298	1391	1396	1386	1173	873	

(1) South East Plan May 2009

(2) 2008/09 error should have been 91 units complete at Holborough Quarry not 182

(3) The Peters Pit site is suitable for housing development and has planning permission which has been implemented. The progression of the scheme has been delayed while arrangements for delivering necessary infrastructure, most notably a new bridge over River Medway, have been put in place. These arrangements have now been positively resolved and there are currently on-going negotiations with the developers about possible phasing options. The phasing included in the draft SHLAA for land supply purposes is notional pending the results of those negotiations and has not been agreed with the developers. It is based upon a start on site in 2014/15 with the first completions in 2015/16. An average annual rate of 100 dwellings a year is typical of schemes of this size and has been adjusted to reflect a profile related to infrastructure provision and funding.

(4) Housing trajectory includes completions from sites with planning permission only - excludes allocations.
