			There seems to be no easy option here, my first thought would be to spread it out everywhere and lessen the pain of a massive estate being built next door to someone, this way we all share the burden, however there also has to be some respect for access to transport links, doctors surgeries, schools etc and the increase in traffic congestion in those areas. There will have to be careful consideration for the need to build upon the existing infrastructure in an environmentally friendly way in areas that need it.	
42683617		Table 9 - List of Sites - Barming 0 & Teston	Alternatively I would say look at a garden village that can be located close to existing major roads with a possible new train station added, along with necessary amenities to support the whole village. Barming and Teston	Noted. The site specific matters raised will be taken into consideration within the site analysis and site selection processes and the spatial strategy option selected.
42684641		Table 9 - List of Sites - Barming 0 & Teston	Site 59425 Flood zone 2 . I think is a good site for infill for a smaller builder. Train station 2k away with bus service on A21 to access Maidstone. Plant trees Q Is it affected by old land fill sites?	Noted. The site specific matters raised in relation to flooding will be taken into consideration within the site analysis and site selection processes.
